

# Folsom City Council Staff Report

<b>MEETING DATE:</b>	8/24/2021
<b>AGENDA SECTION:</b>	Scheduled Presentations
<b>SUBJECT:</b>	Presentation on the City's Stage 3 Water Warning Conservation Stage
<b>FROM:</b>	Environmental and Water Resources Department

## **BACKGROUND / ISSUE**

Environmental and Water Resources Director, Marcus Yasutake, will present information related to the City's Stage 3 Water Warning Conservation Stage. On July 30, 2021, the Bureau of Reclamation (USBR) and Department of Water Resources (DWR) updated their 2021 Drought Contingency Plan. This plan included updated information regarding the current drought conditions and actions that USBR and DWR are taking. Based on projections of Folsom Reservoir storage at the end of December 2021 reaching 145,000 acre-feet, Folsom City Manager Elaine Andersen declared a Stage 3 Water Warning Conservation Stage, which requires a 20% reduction in water use from all water customers. Stage 3 will go into effect on Monday, August 30, 2021. The presentation will include the requirements of Stage 3 and a discussion of the various actions the City will take.

Submitted,
