**The Detailed Forensic Report (DFR)** is a court-admissible analysis of a shooting incident captured by the ShotSpotter system that is produced by forensic engineers. It provides critical details of when and where the shooting incident occurred.

**Expert Witness** testimony of the DFR bolsters the presentation of a case and assists in the trial. A ShotSpotter forensic expert presents the ShotSpotter evidence to the jury and this combination has been successfully admitted in over 225 court cases in 20 states and in the District of Columbia.

# With ShotSpotter You Will...

A photograph of four young children running joyfully across a green lawn. In the foreground, a girl with curly hair wearing a denim jacket and a grey dress runs towards the camera. Behind her, another girl in a black top and white shorts runs. To the left, a girl in a purple patterned shirt and blue jeans runs. In the background, a boy in a blue shirt and dark pants runs. The scene is set outdoors with trees and a road in the distance.
