🚩 Flag Issue

DESCRIPTION

The street light is in the middle of the yard on the property instead of near the sidewalk. It's almost pitch black on the sidewalk in the early mornings and late nights because it's blocked from all the trees.

CLOSED **Nigel - Public Works** (Verified Official)

We have completed your request and are now closing it. After further review, The light in question is on private property and the City has no authority on that matter. We will however look into the low lighting issue at that location and follow up with Georgia Power. Many thanks.
