The applicant is requesting approval to move forward with the conceptual design provided to the city of Forest Park to build a new construction home at 851 White Oak Dr. The current location is a vacant lot, and the previous structure has been demolished. The applicant is interested in constructing a new one-story ranch style home at this location. This update will be a completely new development construction home. The façade that will be included in the newly built construction features a combination of a Gable and Hip Roof design with Asphalt Roof Shingles. There will also be a solid core wood door featuring two panels of glass and three white vinyl double-Hung windows, surrounded by 4-inch fiber cement window trim. The bottom of the structure will also include a 10-inch fiber cement water table. The western exterior of the structure will include Hardie Board Siding and a 10-inch fiber cement water table. The eastern exterior of the structure will include Hardie Board Siding, a 10-inch fiber cement water table and three Double Hung, White Vinyl Windows. The rear of the structure will be similar to the front façade and feature Hardie board siding, fiber cement siding, fiber cement corner boards, Hardie trim, a covered pavilion with three 8-inch fiber cement columns, a solid core wood door featuring two panels of glass as well as three Double Hung, White Vinyl Windows. The proposed project meets the current district standards and would be consistent and compatible with the city's land use and development, plans, goals, and objectives. The project's design is in harmony with the general character developments in the vicinity, considering factors such as mass, building materials, placement, height, land

use patterns, and consistency of exterior architectural treatment. The design components were planned in such a fashion that they are physically and aesthetically related and coordinate with other elements of the project and surrounding environment. The proposed project is compatible with the City of Forest Park's requirements and will not have an adverse effect on the surrounding community. For this reason, Staff recommends to the UDRB that the proposed project be APPROVED.
