EXHIBIT A, STATEMENT OF WORK

Statement Of Work	
Prepared Date:	1/18/2024
Name of Grantee:	City of Fort Collins Utilities
Name of Water Project:	Poudre Water Supply Infrastructure Wildfire Ready Action Plan
Water Project Overview: Please provide brief description of the proposed water activity (no more than 200 words). Please define all acronyms.	
<p>The Cache La Poudre (CLP) Watershed headwaters begin within the Arapaho-Roosevelt National Forest and drain down through the City of Fort Collins (Fort Collins) and urban areas of the Front Range until its confluence with the South Platte River, east of the City of Greeley (Greeley). The watershed is a valuable shared resource between local municipalities, agriculture, and recreational stakeholders. A network of critical water supply infrastructure is located near the watershed divide at Cameron Pass on Highway 14, which Fort Collins, Greeley, and Water Supply and Storage Company (WSSC) use to manage their water supplies. The highest risk to the watersheds that deliver water to these assets, as identified in the Fort Collins’ Source Water Protection Plan, is catastrophic wildfire. Protecting the physical infrastructure and the water stored and conveyed by these structures is a high priority for Fort Collins, Greeley, and WSSC to ensure adequate delivery of reliable and high-quality water supplies to their downstream users and to improve flows in the Poudre River. Fort Collins, Greeley, and WSSC are seeking to develop a Wildfire Ready Action Plan (WRAP) in the shared interest of protecting this interconnected water supply system.</p>	
Project Objectives:	
<p>The goal of this project is to implement a Wildfire Ready Watersheds (WRW) study and develop a WRAP to address the susceptibility of critical water supplies and infrastructure in the Upper Cache la Poudre and North Platte watersheds to post-wildfire impacts and hazards. The WRW study and WRAP will focus on the combined Joe Wright Creek, Peterson Lake, and Headwaters Michigan River watersheds that encompass the Michigan Ditch, Joe Wright Reservoir, Chambers Lake, Barnes Meadow Reservoir, and Peterson Lake.</p>	

Tasks	
Task 1: Vision and Establishment of Goals and Objectives	
Description of Task:	
<p>Fort Collins, in partnership with Greeley, WSSC, and the Coalition for the Poudre River Watershed (CPRW), established a vision and goals for a WRW Framework Study. This effort occurred over several meetings in late 2023 focused on identifying potential stakeholders, reviewing existing watershed planning efforts (i.e. Upper Poudre Resiliency Plan) and other available resources to support the study, and defining the geographic area of concern (WRW target area) for the study. The shared vision for this study is to develop a WRAP to address the susceptibility of critical water supplies and infrastructure in the Cache la Poudre and North Platte watersheds to</p>	

<p>post-wildfire impacts and hazards. This task will focus on sharing and further refining that vision through targeted stakeholder identification and analysis, and outreach and engagement.</p>
<p>Method/Procedure:</p>
<p>Task 1.1 – Stakeholder Identification and Analysis: Fort Collins and Greeley (Core Team) will work with the Fort Collins Utilities Customer Connections Division (C&E Team) to conduct a stakeholder inventory and analysis to 1) identify all relevant watershed stakeholders that may be interested in or affected by the project, 2) analyze the risks and opportunities related to stakeholders in the WRW target area, and 3) develop strategies and tactics for targeted communication, outreach, and engagement with the stakeholders.</p> <p>Task 1.2 – Stakeholder Engagement: The Core Team will convene and participate in two to three facilitated outreach and engagement workshops with all stakeholders. This effort will leverage CPRW’s Upper Poudre Stakeholder Steering Committee meetings and additional workshops for stakeholders who do not currently participate in the Upper Poudre Stakeholder Steering Committee.</p> <p>Task 1.3 – Agreements and Partnerships: The Core Team will develop agreements with partners and stakeholders as needed. These agreements may outline funding agreements, data sharing, resource support, or other resources that may be made available for the WRW study.</p>
<p>Deliverable:</p>
<ul style="list-style-type: none"> • Summary of the stakeholder inventory and analysis • List of key stakeholders • Summary document presenting the outcomes of stakeholder engagement and outreach workshops.

Tasks
<p>Task 2: Stakeholder Collaboration, Community Outreach, and Public Meetings</p>
<p>Description of Task:</p>
<p>The Core Team and/or Consultant will communicate with stakeholders during the planning process to provide updates, solicit feedback, share study findings and priorities, develop agreements, and keep stakeholders informed throughout the development of the WRAP.</p>
<p>Method/Procedure:</p>
<p>Task 2.1 – Communication & Engagement Plan: The Core Team will work with the C&E Team to develop and implement a Communication and Engagement Plan (C&E Plan). The C&E Plan will outline communication strategies and outreach activities to share and solicit information with stakeholders and the broader community during the WRW Framework Study.</p> <p>Task 2.2 – Communication, Outreach & Engagement Activities: The Core Team, with support from the C&E Team and the Consultant, will communicate regularly with stakeholders and lead and participate in outreach and engagement activities. Communication, outreach, and engagement activities will be guided by the stakeholder identification and analysis completed in Task 1 and the strategies and tactics outlined in the C&E Plan developed in Task 2.1.</p>
<p>Deliverable:</p>
<ul style="list-style-type: none"> • Communication & Engagement Plan • Fact sheets and informational brochures for outreach events • Meeting agendas, presentations, and meeting minutes

- Press releases, memos, and other outreach products to be determined in C&E Plan
- Project website and ongoing website communications

Tasks

Task 3: Data Collection, Research, Review, and Gap Analysis

Description of Task:

A considerable amount of data collection and analyses has been completed within the proposed WRAP target area to support restoration efforts following the 2020 Cameron Peak Wildfire and during the development of CPRW’s 2024 Upper Poudre Resiliency Plan. The Consultant, in coordination with the Core Team, will identify, review, and document existing data collection efforts, relevant reports, studies, or research in the WRW target area. The Consultant will compile and organize all available data that can be leveraged to support the WRW Framework Study and conduct a data gap analysis to determine additional data and analysis needs. The WRW GIS Preparedness for Wildfire Planning and Recovery tool developed by CWCB will guide this effort.

Method/Procedure:

Task 3.1 – GIS Data Collection: The Consultant will coordinate with all stakeholders and partners to identify relevant GIS data related to watershed features and characteristics, hazards, assets and values, and basemap and supporting data that may be used to support the study. The data summary will directly reflect the WRW GIS Data Matrix developed by CWCB.

Task 3.2 – Reports, Studies, Research: The Consultant will research previous planning studies, analyses, reports, and research within the WRW target area and provide a review of each including a summary memorandum of the study contents and relevant information that could be used to support the study.

Task 3.4 – Infrastructure Operations: The Consultant will work with the Core Team to gather information related to infrastructure operations for water supply and other values at risk identified in the WRW target area.

Task 3.5 – Stream Data Conditions Assessment: The Consultant will work with the Core Team to select a subset of stream reaches within the WRW target area that may be suitable for post-fire hazard mitigation. The Consultant will assess the existing physical conditions of stream reaches, including geomorphological and riparian conditions. A [River Health Assessment](#) of the Upper Poudre River Watershed was completed in 2019 before the Cameron Peak Wildfire. The results from this assessment may be informative for unburned areas in the WRW target area. CPRW’s recently completed River Health Assessment Framework may serve as a tool to conduct additional assessments of the physical conditions of stream reaches in areas burned by the Cameron Peak Wildfire or in unburned areas where data do not exist (e.g. Upper Michigan River Watershed).

Task 3.6 – Gap Analysis: Once all available data have been collected and reviewed, the Consultant will perform a data gap analysis to identify any necessary data that are not available for the study in a usable GIS format.

Deliverables:

- Data gap summary
- Stream Assessment Technical Memorandum
- Annotated bibliography of all relevant reports, research, and studies
- Literature review summaries
- Tabulation summary of infrastructure operations
- Data Needs and Recommendations memorandum

Tasks
Task 4: Post-Fire Hazard Analysis
Description of Task:
The Consultant will engage with the Working Group to collect the necessary information to conduct post-fire hazard evaluations within the WRW target area. A comprehensive post-fire hazard analysis was recently completed for CPRW’s 2024 Upper Poudre Resiliency Plan that evaluated wildfire hazards, debris flow hazards, hillslope erosion hazards, and road hazards to 7 th -level watersheds. These analyses will be leveraged to support this task. The desired geographic scope of each type of post-fire hazard analysis may be determined based on values and assets at risk, expected post-fire hazard types, and the data necessary for pre-disaster mitigation planning and design. Existing post-fire hazard data and the data gap analysis documented in Task 3 will inform the analysis needs for this task.
Method/Procedure:
<p>Task 4.1 – Pre-Hazard-Modeling Risk Assessment: The Consultant will provide a high-level assessment of the WRW target area to determine where post-fire hazards likely exist and where they may be a threat to water supplies and infrastructure. The purpose of this assessment is to determine both the need for and level of detail appropriate for each hazard type described below in Task 4.2 – Task 4.6. This assessment is meant to guide the Consultant and Working Group to refine hazard analyses to areas and stream reaches where there is a significant risk to water supplies and infrastructure.</p> <p>Task 4.2 – Pre- and Post-Fire Hydrology: The Consultant will conduct a hydrologic analysis to compare pre- and post-fire hydrology for critical stream reaches determined in the Pre-Hazard Modeling Risk Assessment (Task 4.1).</p> <p>Task 4.3 – Post-Fire Hydraulics: The Consultant will develop a hydraulic model using the completed post-fire hydrologic analysis (Task 4.2) to show both pre-fire and post-fire hydraulics for critical stream reaches identified in the Pre-Hazard Modeling Risk Assessment (Task 4.1).</p> <p>Task 4.4 – Fluvial Hazard Zones: The Consultant will develop Fluvial Hazard Zone (FHZ) delineations for critical stream reaches identified in the Pre-Hazard Modeling Risk Assessment.</p> <p>Task 4.5 – Debris Flow: Debris flow modeling was recently completed for 7th-level watersheds, within the Joe Wright Creek watershed, Peterson Lake watershed, and portions of the Headwaters Michigan River watershed, as part of the Upper Poudre Resiliency Plan update. The Consultant will conduct debris flow modeling for critical areas identified in the Pre-Hazard Modeling Risk Assessment (Task 4.1) that have not been analyzed for debris flow hazard. The analyses will be used to identify debris flow probability and predict debris flow volumes from specified rain events.</p> <p>Task 4.6 – Hillslope Erosion: Hillslope erosion modeling was recently completed for 7th-level watersheds, within the Joe Wright Creek watershed, Peterson Lake watershed, and portions of the Headwaters Michigan River watershed, as part of the Upper Poudre Resiliency Plan update. The Consultant will conduct hillslope erosion modeling for critical areas identified in the Pre-Hazard Modeling Risk Assessment (Task 4.1) that have not been analyzed for debris flow hazard.</p>
Deliverables:
<ul style="list-style-type: none"> • Executive summary of post-fire hazard evaluations completed under the WRW Framework study including a discussion regarding the Pre-Hazard Modeling Risk Assessment task and what areas or locations within the watershed were determined to need further hazard evaluations. • Hydrology Technical Memorandum with all supporting documentation, model computer files, and associated GIS data. • Hydraulics Technical Memorandum with all supporting documentation, model computer files, and associated GIS data. • Fluvial Hazard Technical Memorandum with all supporting documentation, model computer files, and associated GIS data.

- Debris Flow Technical Memorandum with all supporting documentation, model computer files, and associated GIS data.
- Hillslope Erosion Technical Memorandum with all supporting documentation, model computer files, and associated GIS data.

Tasks
Task 5: Susceptibility Analysis
Description of Task:
A susceptibility analysis will be completed to evaluate post-wildfire hazard risk to stakeholder values using the collected GIS data, relevant information and reports (Task 3), post-fire hazard analyses (Task 4), and stakeholder values identified through outreach and engagement (Task 2). This assessment will identify and prioritize critical values at risk throughout the WRW target area; however, there will be a focus on water supply and infrastructure.
Method/Procedure:
<p>Task 5.1 – Intersection of Values at Risk with Hazards (point-of-impact): The Consultant will create a geospatial overlay, using available or developed hazard data, of the identified stakeholder values and post-fire hazards. This evaluation will be based on the WRW Framework Risk Matrix developed by CWCB. The intersection of assets and hazards will generate a preliminary determination of whether assets are at risk from post-fire hazards.</p> <p>Task 5.2 – Watershed Susceptibility Risk (watershed risk): The Consultant will use the collected data and outcomes of Task 5.1 to compare post-fire susceptibility of HUC-14 (7th-level) or smaller watersheds throughout the WRW target area. The analysis will develop a risk rating score (i.e. low, moderate, or high) to be used to understand the severity of post-fire impacts on stakeholder values at the watershed level.</p> <p>Task 5.3 – Susceptibility Analysis (stream corridor or stream reach risk): The Consultant will use the outcomes of Tasks 5.1 and 5.2 to complete a susceptibility evaluation across the WRW target area for relevant and probable post-fire hazard impacts. The primary focus of these evaluations will be on post-fire hazard impacts on water supplies and infrastructure.</p> <p>Task 5.4 – Reporting and Mapping: A susceptibility report and web-based map summarizing risk levels by watershed, infrastructure type, and life/property will be produced based on the outcomes of Tasks 5.1 – 5.3.</p>
Deliverables:
<ul style="list-style-type: none"> • Post-fire susceptibility report • Post-fire susceptibility mapping including all supporting and developed GIS data

Tasks
Task 6:
Description of Task:
<p>Building on the WRW Framework Study developed in Tasks 3 – 5, a WRAP will be developed that outlines both:</p> <ul style="list-style-type: none"> • Pre-Fire Actions: Actions, management strategies, and mitigation projects that can be implemented before a wildfire to protect water supplies and infrastructure from post-fire hazards, and • Post-Fire Actions: Actions, management strategies, and mitigation projects that can be implemented following a fire to water supplies and infrastructure. <p>Estimates of implementation costs, permit requirements, timelines, stakeholders, and lead agency (project manager) will be provided for all identified pre-fire and post-fire actions.</p>

Method/Procedure:
<p>Task 6.1 – Pre-Disaster Preparedness Plan: The Consultant will work with the Working Group to develop a list of possible actions to protect water supplies and infrastructure from post-fire hazards. The types of mitigation actions will likely include watershed and stream restoration, infrastructure protection and upgrades, warning systems, water supply systems, burn severity mitigation and fire prevention, and risk mitigation. Following this effort, the Consultant will evaluate the suitability of locations within the WRW target area and along river corridors to support mitigation projects that enhance floodplain connectivity, provide sediment storage, create floodplain storage, increase riparian corridors and vegetative diversity, and incorporate restoration practices that complement the overall goals and objectives of the WRAP. The list of actions and projects will be prioritized, based on input from the Working Group, and a funding program summary will be developed that outlines where and how funding can be used and leveraged to implement these actions and projects. The outcome of these efforts will be documented in a Pre-Disaster Preparedness Plan.</p> <p>Task 6.2 – Post-Disaster Preparedness Plan: The Consultant will work with the Working Group to develop a list of actions that might be taken to further assess post-fire hazards, implement warning systems, and protect infrastructure or values-at-risk from post-fire hazards. The types of mitigation actions will likely include post-fire assessments, GIS data preparedness, contracting, agreements, infrastructure upgrades, and post-fire recovery actions. The Consultant will then assist the Working Group in developing guidance and communications for responding to post-fire recovery and determining roles and responsibilities, financial needs and capabilities, and disaster response permitting. The outcome of these efforts will be documented in a Post-Disaster Preparedness Plan.</p>
Deliverables:
<ul style="list-style-type: none"> • Pre-Disaster Preparedness Plan • Pre-Disaster action mapping including all supporting and developed GIS data • Post-Disaster Preparedness Plan • Post-Disaster action mapping including all supporting and developed GIS data • Online web map displaying proposed pre- and post-mitigation activities (if funding allows)

ASSURANCES OF COMPLIANCE WITH CIVIL RIGHTS REQUIREMENTS

ASSURANCES OF COMPLIANCE WITH TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

As a condition of receipt of federal financial assistance from the Department of the Treasury, the Subrecipient provides the assurances stated herein. The federal financial assistance may include federal grants, loans and Agreements to provide assistance to the Subrecipient's beneficiaries, the use or rent of Federal land or property at below market value, Federal training, a loan of Federal personnel, subsidies, and other arrangements with the intention of providing assistance. Federal financial assistance does not encompass Agreements of guarantee or insurance, regulated programs, licenses, procurement Agreements by the Federal government at market value, or programs that provide direct benefits.

The assurances apply to all federal financial assistance from or funds made available through the Department of the Treasury, including any assistance that the Subrecipient may request in the future.

The Civil Rights Restoration Act of 1987 provides that the provisions of the assurances apply to all of the operations of the Subrecipient's program(s) and activity(ies), so long as any portion of the Subrecipient's program(s) or activity(ies) is federally assisted in the manner prescribed above.

1. Subrecipient ensures its current and future compliance with Title VI of the Civil Rights Act of 1964, as amended, which prohibits exclusion from participation, denial of the benefits of, or subjection to discrimination under programs and activities receiving federal financial assistance, of any person in the United States on the ground of race, color, or national origin (42 U.S.C. § 2000d *et seq.*), as implemented by the Department of the Treasury Title VI regulations at 31 CFR Part 22 and other pertinent executive orders such as Executive Order 13166, directives, circulars, policies, memoranda, and/or guidance documents.
2. Subrecipient acknowledges that Executive Order 13166, "Improving Access to Services for Persons with Limited English Proficiency," seeks to improve access to federally assisted programs and activities for individuals who, because of national origin, have Limited English proficiency (LEP). Subrecipient understands that denying a person access to its programs, services, and activities because of LEP is a form of national origin discrimination prohibited under Title VI of the Civil Rights Act of 1964 and the Department of the Treasury's implementing regulations. Accordingly, Subrecipient shall initiate reasonable steps, or comply with the Department of the Treasury's directives, to ensure that LEP persons have meaningful access to its programs, services, and activities. Subrecipient understands and agrees that meaningful access may entail providing language assistance services, including oral interpretation and written translation where necessary, to ensure effective communication in the Subrecipient's programs, services, and activities.
3. Subrecipient agrees to consider the need for language services for LEP persons when Subrecipient develops applicable budgets and conducts programs, services, and activities. As a resource, the Department of the Treasury has published its LEP guidance at 70 FR 6067. For more information on taking reasonable steps to provide meaningful access for LEP persons, please visit <http://www.lep.gov>.

4. Subrecipient acknowledges and agrees that compliance with the assurances constitutes a condition of continued receipt of federal financial assistance and is binding upon Subrecipient and Subrecipient's successors, transferees, and assignees for the period in which such assistance is provided.
5. Subrecipient acknowledges and agrees that it must require any sub-grantees, contractors, subcontractors, successors, transferees, and assignees to comply with assurances 1-4 above, and agrees to incorporate the following language in every Agreement or agreement subject to Title VI and its regulations between the Subrecipient and the Subrecipient's sub-grantees, Contractors, Subcontractors, successors, transferees, and assignees:

The sub-grantee, Contractor, Subcontractor, successor, transferee, and assignee shall comply with Title VI of the Civil Rights Act of 1964, which prohibits Subrecipients of federal financial assistance from excluding from a program or activity, denying benefits of, or otherwise discriminating against a person on the basis of race, color, or national origin (42 U.S.C. § 2000d et seq.), as implemented by the Department of the Treasury's Title VI regulations, 31 CFR Part 22, which are herein incorporated by reference and made a part of this Agreement (or agreement). Title VI also includes protection to persons with "Limited English Proficiency" in any program or activity receiving federal financial assistance, 42

U.S.C. § 2000d et seq., as implemented by the Department of the Treasury's Title VI regulations, 31 CFR Part 22, and herein incorporated by reference and made a part of this Agreement or agreement.

6. Subrecipient understands and agrees that if any real property or structure is provided or improved with the aid of federal financial assistance by the Department of the Treasury, this assurance obligates the Subrecipient, or in the case of a subsequent transfer, the transferee, for the period during which the real property or structure is used for a purpose for which the federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. If any personal property is provided, this assurance obligates the Subrecipient for the period during which it retains ownership or possession of the property.
7. Subrecipient shall cooperate in any enforcement or compliance review activities by the Department of the Treasury of the aforementioned obligations. Enforcement may include investigation, arbitration, mediation, litigation, and monitoring of any settlement agreements that may result from these actions. The Subrecipient shall comply with information requests, on-site compliance reviews and reporting requirements.
8. Subrecipient shall notify the OSC, who will report to the Department of Treasury, any complaints of discrimination on the grounds of race, color, or national origin, and limited English proficiency covered by Title VI of the Civil Rights Act of 1964 and implementing regulations and provide, upon request, a list of all such reviews or proceedings based on the complaint, pending or completed, including outcome.
9. Subrecipient must provide documentation of an administrative agency's or court's findings of non-compliance of Title VI and efforts to address the non-compliance, including any voluntary compliance or other agreements between the Subrecipient and the administrative agency that made the finding. If the Subrecipient settles a case or matter alleging such discrimination, the Subrecipient must provide documentation of the settlement. If

Subrecipient has not been the subject of any court or administrative agency finding of discrimination, please so state.

10. If the Subrecipient makes sub-awards to other agencies or other entities, the Subrecipient is responsible for ensuring that sub-Subrecipients also comply with Title VI and other applicable authorities covered in this document State agencies that make sub-awards must have in place standard grant assurances and review procedures to demonstrate that that they are effectively monitoring the civil rights compliance of sub- Subrecipients.
