

2025 Our Climate Future Council Roadmap

The OCF Council Roadmap (below) is a strategic, visual tool for Council to use when considering decisions across multiple areas over time and how they impact community climate goals and progress toward Our Climate Future Big Moves. The *Roadmap* presents initiatives that offer *Pathways* toward achieving adopted goals and shows what tools are available to make progress. It includes decision points in areas of policy, project, and program development where Council will be involved through Work Sessions and formal adoption processes. However, it does not include all work that advances OCF Big Moves, and community-led initiatives are not included.

What the Roadmap does:

- Shows what actions are available to help reach community climate and waste goals
- Demonstrates how these actions connect to OCF Big Moves (through Pathways)
- Focuses on actions that reduce climate pollution, air pollution, and waste in five key areas: *mobility, buildings, land use, waste, and funding*

An asterisk (*) indicates a change from the 2024 Roadmap.

Legend:

Mobility Related Big Moves

Buildings Related Big Moves

Land Use Related Big Moves

Waste Related Big Moves

Funding/Revenue

Other Connection to OCF

2025 OCF Council Road Map

	Budget Cycle		Budget Cycle	
	2023	2024	2025	2026
