**Re: Planned Unit Development – Preliminary Development Plan Application**

**Intersection of Shaker Road and Manchester Road, City of Franklin, Warren  
County, Ohio Parcel ID 0835200001**

To Whom It May Concern:

Enclosed herewith are application materials for my client Forestar (USA) Real Estate Group Inc.'s proposed development of a single family residential home subdivision on the above-referenced property. For your convenience, the following is a list of the materials being submitted as part of the application:

1. Executed copy of the application;
2. Notarized letter of authorization from the property owner;
3. Legal description of the property;
4. List of all contiguous/adjacent owners;
5. General support narrative and statement (addressing the matters required by Items D and E of the application);
6. Preliminary Development Plan (showing the matters required by Item F of the application), including Parkland Requirements and Standards;
7. Depictions of proposed community amenities;
8. Existing Conditions Plan (included within Preliminary Development Plan);
9. Engineering feasibility statement; and
10. Application Fee Check;

My client and I appreciate your consideration of the Application and look forward to working with the City of Franklin to bring this promising development to fruition. Please do not hesitate to reach out to me directly should you have any questions regarding the contents of the application.

Very Truly Yours,

Charles E. Baverman III  
Attorney for Forestar (USA) Real Estate  
Group Inc.

**Re: Supplement to Planned Unit Development Application**

**Intersection of Shaker Road and Manchester Road, City of Franklin, Warren County, Ohio Parcel ID 0835200001**

To Whom It May Concern:

This letter accompanies a Planned Unit Development Application submitted on behalf of my client, Forestar (USA) Real Estate Group Inc. ("Forestar"). Forestar proposes to develop 284 single family residential lots on an approximately 110 acre parcel located at the intersection of Shaker Road and Manchester Road in the City of Franklin (the "City"), Warren County, Ohio Parcel ID 0835200001 (the "Property"), as set forth in the preliminary development plan that accompanies this application (the "Plan").

In order to facilitate this development, contemporaneously with this application Forestar has also submitted an application to re-zone the Property to the Planned Unit Development Overlay District ("PUD"). This letter will explain Forestar's proposed development of the Property as depicted in the Plan.

### Developer Overview

Forestar is a leading national residential lot developer focusing on the affordably priced single family home market. Based in Arlington, Texas, Forestar has averaged more than 14,500 residential lot deliveries annually from 2020 through 2023. It currently holds a portfolio of approximately 82,400 lots throughout the country, as shown in the graphic below.

## DIVERSIFIED NATIONAL FOOTPRINT

57 MARKETS | 23 STATES

Forestar is a majority-owned subsidiary of D.R. Horton, the largest homebuilder by volume in the United States since 2002. Forestar's strong relationship with its parent entity creates a preferred buyer for Forestar developed lots. Forestar expects that D.R. Horton will acquire and develop all or a majority of the lots within this PUD.

### Property and Surrounding Area

The Property is currently being used for agricultural purposes, with one residential structure constructed in 1963 located on the entire 110 acre parcel. In 2023 the Property was annexed into the City.

The Property sits along the southern boundary line of the City and is bordered by agricultural farmland to the north and industrial property to the east. Outside of the City's boundaries, the land immediately south of the Property is being used as agricultural farmland and to the west is a single family residential home subdivision.

### Preliminary Development Plan

The Plan included with this application contains 46 townhome lots, 135 fifty-foot width lots and 103 sixty-foot width lots for a total density of 2.59 units per acre. All lots will have 25-foot front and rear setbacks. Numerous community amenities are featured including pickleball courts, a children's play area, dog park and walking trails, which will all be maintained by a homeowners association to be created prior to the sale of lots to end users. Over 20% of the total land area is designated as open space, some of which will be dedicated as parkland as further explained below.

Forestar will extend public water and sewer connections to and throughout this development and construct public streets and street lighting in compliance with City standards. All other components of the development will also comply with City standards,

including without limitation Chapter 1109.05 and 1111.03 of Section 1109.05 of the City's Municipal Code.

Forestar expects to spend approximately \$23,000,000 in the development of this project. That investment, combined with the investment in homes construction to be made following subdivision development, will enhance the value of surrounding properties and the addition of this community to the City's tax base will benefit the City as a whole.

### Comprehensive Plan Compliance

Forestar's proposed development aligns with the recently completed Reinvent Franklin 2040 Comprehensive Plan (the "Plan"), which intends for the Property to be used for single-family residential housing. The Future Land Use Map identified as Map 2.7 in Chapter 2: Land Use of the Plan designates the Property for "low density residential" use in the future. Under the Plan, "low-density residential" is defined as:

"0-6 dwelling units per acre. Characterized by single-family residential development with lots ranging in size and one to two-story buildings. These lots are characterized by a variety of single-family dwellings, ample open space, extensive landscaping, and separations between single-family dwellings and/or accessory buildings."

The Plan identifies that the future land use map "provides a clear understanding of what the City expects for new development."

Forestar's proposed development would also promote the goals and findings of the Plan. Chapter 5 of the Plan lists the main goal of the Plan's housing chapter as creating the conditions that create choice neighborhoods in the City, resulting in those neighborhoods becoming desirable and attractive housing options in the Miami Valley market. This goal comports with the finding made on page 82 of the Plan, which states that there is a need for higher-end housing in the City and housing designed to lure young professionals and families to the City. The Plan identifies infill development as one of the ways that the Plan hopes to achieve its goal of creating choice neighborhoods of higher-end housing within the City, as outlined in Chapter 2: Land Use. However, as stated in the Plan, infill development in 'core neighborhoods' should shy away from single-family redevelopment.

Ultimately, Forestar's development of the Property into single-family home lots would achieve the above-stated goals of the Plan by creating a highly desirable neighborhood that will stand out in the Miami Valley market and provide higher-end housing options that attract young professionals and families into the City. Further, the development of this community on a newly annexed site comports with the Plan's goal of utilizing infill development on underdeveloped property to achieve the goals of the Plan, while avoiding the infilling of core neighborhoods where the Plan indicates that higher-density housing options are desired. Overall, the Forestar development will signal that the City is an economically vibrant and desirable locale where high-quality development is taking place, both of which concepts are underscored throughout the Plan.

### Parkland Requirements and Standards

At a rate of 3.25 persons per single family home, this 284 lot PUD can be expected to have a total population of 923 persons. Forestar proposes to dedicate approximately 15.09 acres of open space within the development (13.78% of the Property) as parkland, in the location shown on the Plan.

### Conclusion

As explained above, a single family residential home community is an ideal use for the Property that will have a positive economic impact for the City and will enhance the quality of life available to current and future City residents. We respectfully request approval of this application so as to facilitate the development of this exciting project.

RE: Shaker Farms Engineering Feasibility – Preliminary Development Plan – Franklin, OH

Dear Planning Commission:

On behalf of Forestar (USA) Real Estate Group, Inc., CESO, Inc. is pleased to submit this engineering feasibility statement to accompany the Preliminary Development Plan application for the Shaker Farms Development. This project is located at 5764 Shaker Road, Franklin, OH 45005. The subject parcel (PID: 08352000010) is presently owned by Mary L. Werline, Trustee of the Werline Family Revocable Trust.

### **Stormwater Management**

The existing site currently consists predominantly of open fields. The site is bound to the north and south by agricultural fields, to the west by several single-family lots and Shaker Road, and to the east by woods and an existing homestead. The existing tributary area consists of type B, C, B/D & C/D soils. The site is split by a ridgeline near the middle of the property with approximately half the site draining via overland flow to the east and the other half draining via overland flow to the west.

The proposed development consists of 284 single-family units and two (2) large open space reserves with associated roadway, walkways, site utilities, and two (2) retention basins. Post construction drainage patterns will generally follow existing conditions. This will be done by utilizing the two (2) proposed retention basins located in the northwest and eastern areas of the site.

Drainage swales and an underground storm sewer network will be constructed to convey runoff to the proposed retention basins. The stormwater runoff will be collected using a system of curb & gutter inlets and catch basins at localized low points. The storm sewer design on this project will be based on the 10-year storm event and checked using the 25-year storm event in accordance with the regulations set forth by the Warren County Stormwater Design Manual. If a higher storm event would take place or clogging/obstructions were to occur the site will be properly graded to convey the 100-year storm event by overland flow to the proposed retention basins while providing a minimum 1-foot of freeboard from any home.

Runoff from the development will be routed to the proposed retention basins. The proposed retention basins will be utilized to serve the site for both water quality and water quantity purposes. During the final engineering process, CESO, Inc. will develop a detailed stormwater management plan designed to meet the requirements set forth by the City of Franklin, outlined by the Warren County Stormwater Design Manual, as well as the water quality requirements set forth by the Ohio EPA General Construction Permit OHC000006.

**Sanitary Sewer**

An existing sanitary sewer is accessible along Shotwell Drive, east of the proposed development. Based on the ridgeline near the middle of the site, a portion of the development would require to be serviced by a sanitary lift station, that ties into gravity sewer on the eastern portion of the site, that ultimately ties into the existing sanitary sewer along Shotwell Drive. It is CESO's understanding the City of Franklin would allow for this development to tie into this existing sewer. However, capacities would need to be confirmed based on the proposed development plan.

**Water Main**

An existing water main is accessible along both Shaker Road to the west and Manchester Road to the south. It is CESO's understanding these water mains are controlled by Warren County and connection to these may not be feasible. Connection is also proposed to the City of Franklin Water Tower directly north of and adjacent to the proposed development. Water capacities would need to be confirmed based on the proposed development plan, including ample fire flow capabilities in the water distribution system for residential uses.

Thank you for your consideration of the above Preliminary Development Plan application.

Should you have any further questions, please do not hesitate to contact me.

Respectfully,

A handwritten signature in blue ink, appearing to read 'Justin Elam', is written over a horizontal line.
