Share your comments about Ordinances 2023-7, 2023-8: I do not know what will be done with this but I wanted to express my concerns. I would hate to not be able to share the memories that I have had growing up here as a kids with my girls. The swing in the pine tree and the overall beauty this place holds. I've heard rumors of it turning into a camp resort but my concern with that, if it's true is it will price people out. I never camped here as a kid but I always used it as a picnic site to go fish and hangout for the day. It is my understanding that the people stated that are interested in buying it will use it for their own personal advantage of making more money or turning it for their cattle which I completely understand as land, water, and vegetation is getting harder to acquire. My other concern would be with the game management unit and the fact that these three owners of Land adjacent to the property will be able to acquire more hunting vouchers that will only decrease the number of tags that can be sold to non private holders as well as decrease the numbers in herds. I also understand that over the years it has gotten harder for the city to manage this lake but I hope that if a larger community presence is involved it will allow the city to understand that this isn't just any piece of land. It holds special memories for many community members.
