RE: ACTIVE CIRCULATION AND FREMONT STREET DESIGN REVIEW & DISCUSSION

BACKGROUND

The City was awarded Multimodal Option Funding from CDOT in 2020 to complete an Active Circulation Plan and the design of Fremont Street at Highway 6 heading north. RFQs were sent out for both projects back in 2020 with Fehr & Peers and Kimley Horn being selected for the Active Circulation Plan and the Fremont Street Design, respectively.

An online survey and interactive map was set up for the Active Circulation Plan where public input was collected. In addition, a joint open house was set up for additional public input in late July on a Friday night at Civic Center Park as well as Saturday morning at the Farmers' Market.

A draft Circulation Plan is available for review. The 90% construction drawings for the Fremont Street Design have been submitted to CDOT for their review with a review meeting set for November 8, 2021.

It is the intention of this item to provide an overview of the Active Circulation Plan followed up with any comment that can be provided back to the consulting team and to provide an overview and discussion of the Fremont Street Design project.
