ALTERATIONS MADE WITHOUT CONSULTATION MAY COMPROMISE STRUCTURAL INTEGRITY AND SAFETY OF THE BUILDING .

Please note that the provided drawings and calculations are specifically intended for the designated replacement members. It's important to understand that we will not oversee the construction phases and cannot comment on the structural qualities beyond the designated components. It's crucial to emphasize that we cannot accept any responsibility or liability for potential structural defects or emerging issues. Additionally, no foundation inspection or invasive tests, such as soil assessments or plumbing leak tests, were conducted. Therefore, we cannot assume responsibility for potential future soil behavior, including swelling, that might impact the foundation. This responsibility is left to the contractor and the owner.
