GRPUC Strategic Plan – our Mission, Vision and Values

WHO WE ARE

Grand Rapids Public Utilities (GRPU) is a statutory municipal utility established by the city of Grand Rapids, Minnesota. The Grand Rapids Public Utilities Commission (GRPUC) provides full control, operation and management of the GRPU electric power distribution system, the water production, treatment and distribution systems, and the wastewater collection and treatment systems.

Our Vision

Our vision is to be a dynamic public asset for the thriving community of Grand Rapids, enhancing lives and fostering growth through excellence in the provision of essential utility services.

Our Mission

Our mission is to empower GRPU team members to deliver safe, reliable, affordable, sustainable, and customer-focused utility services for our community.

Our Values

- Safety* We hold paramount the well-being of our employees and the public in all operations.
- Integrity* We uphold ethical standards and foster trust with all stakeholders.
- Customer Focus* We prioritize customer needs and satisfaction in all our decisions and actions.
- Efficiency* We maximize resources to provide cost-effective services without compromising quality.
- Reliability* We consistently deliver high-quality utility services and strive for uninterrupted access.
- Sustainability* We employ environmentally responsible practices in our operations and services.
- Transparency* We openly share information and decision-making processes, promoting informed community involvement.

Operations: 2024 Q4 Annual Plan Scorecard Update by Julie Kennedy

2023-2028 Strategic Plan

Strategic Plan GRAND RAPIDS PUBLIC UTILITIES/2023 15

OPERATIONAL PLANNING, REPORTING AND ACCOUNTABILITY

PLANNING

Each year in September, the GRPUC and GM will review the organization's SWOT, strategic and operational progress. Over the next month, the strategic plan will be updated. Implications and priorities for operations will then be discussed with the GRPUC in October.

Following updated and reaffirmed strategic direction from the GRPUC, the GM and staff will create an annual operating plan. This plan will include SMART goals based on the operating priorities and strategic intent of the GRPUC.

The annual budget will be developed to support the successful realization of the operating plan. Each year GRPU's Audit and Finance Committee will review the budget in November and provide feedback. The final draft of the operating plan and supporting budget will be referred to the GRPUC for action at their December meeting.

REPORTING

Monthly staff reports to the GRPUC will align with and reference the approved operating plan. Items requiring action by the GRPUC will be placed on the agenda.

The GM will report to the GRPUC on progress toward achieving each approved goal/deliverable in a report card prepared in advance of GRPUC meetings in the months following the end of each quarter (April, July, October, and January).

Timelines and/or other details regarding achievement of the SMART goal(s) will be adjusted as needed when conditions require doing so.

SMART goals will not be fully discarded unless they are being replaced with another tactic that will achieve the strategic objective they support. GRPUC action is required to alter or eliminate a strategic objective.

STAFF ACCOUNTABILITY

Each year, employees work toward individual performance goals that support GRPU's objectives and aid in their own professional development.

Beginning in 2024, annual employee goals will align with the SMART goals in GRPU's operating plan, and we will foster an organizational culture that is consistent with GRPU's vision, mission, and values as described in the Strategic Plan.

Supervisors will provide ongoing feedback to employees in a manner determined by the GM and consistent with relevant union contracts. Our intent is to ensure that each GRPU team member feels fully connected to the organization's strategic path, knows how they uniquely contribute to achieving our goals, and are supported by the entirety of GRPU in carrying out their roles.

Capital: Server Optimization by Mike LeClaire

IT consultant assisting us with migrating our virtual on-premise servers to cloud

Benefits

- Scalability, flexibility, and cost effectiveness
- Reduced cost in expensive hardware and infrastructure
- Customize services to meet business needs
- Advanced Security Features
 - Protect data and applications from cyber threats
- Strong integration capabilities
- Support for open-source technologies
 - Tools and technologies for easy integration and deployment with existing applications
- Disaster Recovery
 - Ensure business critical applications/data are available in the event of disasters or outages
