WATER MONTHLY ANALYSIS REPORT February 2025

Water Operations

The water plant pumped an average of 0.88 million gallons of water per day (MGD) with a peak of 1.03 million gallons during last month which is normal for this time of the year.

Slight uptick in hardness over the month due to operational issues. The rest of the water quality analysis was normal for the month as seen in the graphs below.

Due to the disinfection, water softening was increased to enhance corrosion protection measures.
