Re: Proposal for a Geotechnical Evaluation
Proposed Taxilane Rehabilitation
Grand Rapids/Itasca County Airport
1500 7th Avenue Southeast
Grand Rapids, Minnesota

Dear Lindsay:

Braun Intertec Corporation respectfully submits this proposal to complete a geotechnical evaluation for the proposed rehabilitation of the taxilanes at the referenced site.

Project Information

Per our correspondence with you and the provided preliminary design plan, the project will include the rehabilitation of the bituminous taxilanes north of the GA Apron and east of 7th Avenue Southeast. The project is approximately 7,400 square yards (SY) of pavement and is separated by AIP Eligible and ineligible funding areas (3,280 SY eligible / 4,120 SY ineligible). We understand all soil borings will be performed in the eligible funding areas. The locations of the soil borings have been selected by and will be surveyed by SEH.

Purpose

The purpose of our geotechnical evaluation will be to characterize existing pavement and subsurface geologic conditions at selected exploration locations and evaluate their impact on the design and rehabilitation of the taxilanes.

Scope of Services

We propose the following tasks to help achieve the stated purpose. If we encounter unfavorable or unforeseen conditions during the completion of our tasks that lead us to recommend an expanded scope of services, we will contact you to discuss the conditions before resuming our services.

Site Access

Based on aerial photographs and previous site visits, it appears that the site is accessible to a truck drill rig. We understand our field work will be completed during daylight hours. We assume there will be no cause for delays in accessing the exploration locations.

Depending on access requirements, ground conditions or potential utility conflicts, our field crew may alter the exploration locations from those proposed to facilitate accessibility.

Our drilling activities may also impact the vegetation and may rut the surface to access boring locations. Restoration of vegetation and turf is not part of our scope of services.

Utility Clearance

Prior to drilling or excavating, we will contact Gopher State One Call and arrange for notification of the appropriate utility vendors to mark and clear the exploration locations of public underground utilities. A Braun Intertec representative will arrange an on-site utility meet with the notified locators at the project site. You, or your authorized representative, are responsible to notify us before we begin our work of the presence and location of any underground objects or private utilities that are not the responsibility of public agencies.

Penetration Test Borings

As requested, we will drill 4 standard penetration test (SPT) borings for the project, extending them to 10 feet. Standard penetration tests will be performed continuously in the upper 5 feet and at 2 1/2-foot vertical intervals at greater depths. We will collect bag samples from the auger cuttings of the subgrade for laboratory testing.

If the borings encounter groundwater during or immediately after drilling of each boring, we will record the observed depth on the boring logs.

If the intended boring depths do not extend through unsuitable material, we will extend the borings at least 5 feet into suitable material at greater depths. If we identify a need for deeper (or additional) borings, we will contact you prior to increasing our total estimated drilled footage and submit a Change Order summarizing the anticipated additional effort and the associated cost, for your review and authorization.

MDH Notification and Sealing Record

Since our planned exploration will be less than 15 feet in depth, the Minnesota Statutes will not require that we complete any notifications or sealing records. If we extend any of the borings to a depth of 15 feet or greater, the Statutes requires that we seal the boreholes and complete a Sealing Record. If 25 feet or greater, the Statutes also require us to complete a Sealing Notification Form. If the Record or Form are required, we will contact you to discuss the additional fees and sealing requirements.

Borehole Abandonment

After completing the soil borings, the borings will be backfilled with cuttings and patched. Over time, subsidence of borehole backfill may occur, requiring surface grades to be re-leveled or patches to be replaced. Braun Intertec is not assuming responsibility for re-leveling or re-patching subsequent to initial backfilling and patching long term.

Sample Review and Laboratory Testing

We will return recovered samples to our laboratory, where a geotechnical engineer will visually classify and log them. To help classify the materials encountered and estimate the engineering properties necessary to our analyses, we anticipate performing moisture content tests, an Atterberg limits test, a

sieve hydrometer analysis, a standard Proctor test, and a California Bearing Ratio test. We will adjust the actual number and type of tests based on the results of our borings.

Report

We will prepare a report including:

- A sketch showing the boring locations.
- Logs of the borings describing the materials encountered and presenting the results of our groundwater measurements and laboratory tests.
- A summary of the subsurface profile and groundwater conditions.
- Discussion identifying the subsurface conditions that will impact pavement design and construction.
- Discussion regarding the reuse of on-site materials during construction.
- Recommendations for preparing pavement subgrades, and the selection, placement and compaction of fill.
- Recommended CBR value to aid in pavement design.

We will only submit an electronic copy of our report to you unless you request otherwise. At your request, we can also send the report to additional project team members.

Schedule

We anticipate performing our work according to the following schedule.

- Drill rig mobilization – within about 4 weeks following receipt of written authorization
- Field exploration – 1 day on site to complete the work
- Classification and laboratory testing – within 2 weeks after completion of field exploration
- Preliminary results – within 2 weeks after completion of field exploration
- Final report submittal – within 4 weeks after completion of field exploration

If we cannot complete our proposed scope of services according to this schedule due to circumstances beyond our control, we may need to revise this proposal prior to completing the remaining tasks.

Fees

We will furnish the services described in this proposal for a lump sum fee of \$5,900, Please note that our drilling/field services were budgeted to occur within our normal work hours of 7:00 a.m. to 5:00 p.m., Monday through Friday. We have budgeted for nighttime work for a portion of the field work. If conditions occur that require us to work outside of these hours discussed, we will request additional fees to cover our additional costs. Our work may extend over several invoicing periods. As such, we will submit partial progress invoices for work we perform during each invoicing period.

General Remarks

We will be happy to meet with you to discuss our proposed scope of services further and clarify the various scope components.

We appreciate the opportunity to present this proposal to you. Please sign and return a copy to us in its entirety.

We based the proposed fee on the scope of services described and the assumptions that you will authorize our services within 30 days and that others will not delay us beyond our proposed schedule.

We will provide our services under the terms of the Agreement for Professional Services dated July 2, 2008.

To have questions answered or schedule a time to meet and discuss our approach to this project further, please contact Aaron Tast at 320.980.3504 (atast@braunintertec.com).

Sincerely,

BRAUN INTERTEC CORPORATION

- c. has not entered into any subcontract for any product to be used on the Federal on the project that is produced in a foreign country included on the list of countries that discriminate against U.S. firms published by the U.S.T.R.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code, Section 1001.

The Offeror/Contractor must provide immediate written notice to the Owner if the Offeror/Contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. This certification is a material representation of fact upon which reliance was placed when making an award. If it is later determined that the Contractor or subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration may direct through the Owner cancellation of the contract or subcontract for default at no cost to the Owner or the FAA.
