MINIMUM BILL: CUSTOMER CHARGE PER CONNECTION

PURCHASED POWER ADJUSTMENT (PPA) CLAUSE

There shall be added to from the monthly electric service billing, a Purchased Power Adjustment or PPA calculated on a per kilowatt-hour basis. The PPA is a combination of two charges. The first are costs associated with operation of the Midwest Independent Transmission System Operator (MISO). MISO's objective is to maximize the efficient use of the transmission system and energy under fluctuating power demands. The second component is fuel and purchased energy, which is based on the fluctuating cost of fuel used in generating stations and power purchased from other energy providers when needed. PPA does not apply to Security Lighting and Non-Metered Load Management Services.

Administration

The general manager has the authority to approve a fee for an unusual and extraordinary service not listed as a primary or secondary ancillary service of the GRPU. The fee should cover all direct and indirect costs of providing this service. If this unusual and extraordinary service is provided more than once per year to more than five customers or requestees then the fee should be presented and approved by the GRPU Commission.

The general manager has the authority to reduce an approved secondary ancillary fee down to zero one time per customer for an unusual or extraordinary circumstance if the ancillary fee is \$500 or less. If there are more than five customers with same or similar circumstance then the general manager action to reduce an approved secondary ancillary fee will need to be ratified by the GRPU Commission at the next commission meeting.

Non-payment reconnections will only be performed during regular business hours per GRPU Commission.
