Project # WATR2202  
 Project Name Water Leak Study

Total Project Cost: \$8,200

### Description

The last water leak study was completed in 2017 for our distribution system. We are due to have another one completed in order to help with our unaccounted flow (+10%)

### Justification

Annually, we account for water usage throughout the system and we report how much water was unaccounted for. The target is less than 10%. Last year we were over that target amount so a leak study is necessary to help reduce loss in the distribution system.

Project # WATR2211  
 Project Name WTP Communication with Wells

Total Project Cost: \$15,000

### Description

The communication system between the WTP and remote wells is less than ideal and is outdated.

### Justification

The communication system between the remote wells and the WTP fails 3-4 times weekly causing water supply challenges. A new updated communication system will help the reliability of the water production process.

Project Name	Leachate Phase Pump

Type Unassigned

Useful Life 10

Category WW System

Priority 02 - Significant Need

Status Active

Total Project Cost: \$16,000

### Description

We are required be permit to continuously pump out leachate from the sumps of nine phases in the landfill. Failure of a pump would require weeks to repair which would lead to a violation. A spare pump will allow maintenance to immediatedly address the issue.

### Justification

We are required be permit to continuously pump out leachate from the sumps of nine phases in the landfill. Failure of a pump would require weeks to repair which would lead to a violation. A spare pump will allow maintenance to immediatedly address the issue.

 Project Name Engineering Design - Landfill Cover

Type Unassigned

Useful Life 20

Category WW System

Priority 02 - Significant Need

Total Project Cost: \$50,000

### Description

GRPUC will need to manage leachate for the unforeseen future, possibly decades. Long term it makes sense to pump it rather than haul it in a truck.

### Justification

In 2022, we will start the detailed design of the leachate pipeline to the WWTP.

Project #	WWSP1804
Project Name	Secondary Aeration Basin Mixer Repairs

Type Unassigned

Useful Life 20

Category Equipment

Priority 02 - Significant Need

Status Active

Total Project Cost: \$1,000,000

### Description

The thirty-plus year old aeration basin mixers need to be overhauled in order to provide the mixing needed within our activated sludge process. This work will include rebuilding the gearbox and replacing the shaft and both lower and upper impellers of two mixers when necessary.

### Justification

Upon inspection of aeration basins, lower impellers have fallen off, mixer shafts have sheared off. Additionally the gearboxes need to be rebuilt. The project will include removing the existing gearbox, shaft and impellers and replacing with a rebuilt gearbox and a new shaft and impellers. We started this process a few years ago and our industrial partner would like us to continue to work at revamping these.
