The sludge dump trucks are used for dewatered sludge storage but also are the only means to transfer the sludge to the open landfill one mile away. WW operators manage the dewatering process utilizing the fleet of dump trucks. The asset management plan listed the 2001 Chevy Kodiak machine as an immediate priority of replacement and it will be sold at public auction for an estimate of \$5,000-\$15,000.

The GRPUC Procurement Policy was followed as state bid pricing was utilized.

The vendor's Certificate of Insurance has been verified to meet the contract requirement and is on file.
