watching the arson trial of the MEC employee that lived out in the Bennett Street homeless camps and walked back and forth to work, I believe that Haven should be fired immediately from a position that she knew he was there. She knew, you know, that she has people living in the woods and working. I don't know if it's under the table. I don't know if they're illegals. I don't know. She doesn't speak English, she can't interpret her, but this soulless information is available in the court documents, so it's nothing they're making up. This is the CAL FIRE and FIRE investigators' words under oath on the stand. So the energy that's being put into FIRE in this area is opposite of what really needs to be going on, and that seems like it would be a priority, but it seems to be the least of your guys' worry that you're going to go ahead. And again, Haven, Hillary, Eric, and Hamilton's are all trying to get restraining order violations against me. You guys are still trying to sue me in backdoor session. What is wrong? What is wrong with you people? I toss it off to alcohol. Jam's dreaming. Other people are having other issues. I don't know, but it's quite evident from watching these meetings and participating in the meetings and seeing how you guys react, see how Tim reacts when someone asks to do something, that road up there is all toxic mind waste. Up on doors, it's flying into the air every time people drive over. That's a freaking super fun site. They all need mitigation before it can be built on. So, you guys are freaking ***** people in town, everyone, but you're worried about the art. And Haven, you were supposed to put that coating on the veterans art over at Memorial Park and you never did. You never helped that girl that you said you were going to help. So all these lies that you guys tell, you know, I don't know, it's freaking sad. You really destroyed our town and the fact that no one comes to the meetings and no one really wants to participate No one believes in you and Kim Kaiser needs to be fired immediately
