**Transcript:** Hi, this is Matthew Colter trying to comment on the consent calendar number two Chinese station Does that sound suspicious to anyone? That you guys are approving doing business with Number eight this kid steer they're already been using it for a week So I don't know why you guys are even involved unless it's just a rubber stamp it Because it doesn't say anything about it's already being used and it's already a done deal So I guess they overrode you for purchase of a very expensive piece of equipment. Dependent Street Rehab, number nine, the striping. There's no bicycle lanes. There should have been more striping, but in place with our road rehabilitation projects for bicycles and pedestrians to use to be able to cross the streets, because there's also no crosswalks to get to the other side of the street. Number 10, the landscaping tax should be repealed because it's not really being landscaped. The

sprinklers are broken, the trees are dead, I speak particularly of whispering pines. The dust that's being put into the air from the new construction project next to Peaceful Valley Farm Supply is outrageous, but particularly on the landscaping situation, you need to around and look at it. It's at least 50% of the stuff is dead from when you originally planted it and it was originally planned. It's never been replanted or upgraded or even rehabbed at all. Thank you.

**Transcript:** Hello, this is Matthew Colter making public comment for the city council meeting on June 24th, 6 PM. And I'd like to focus around the Dorsey marketplace situation. And moreover, where everyone is moving to from there, which is the Idaho, Maryland camps at the corner of Centennial and Idaho, Maryland, the rise gold property, which is Nevada county sheriff office jurisdiction to oversee even though it's right in town. and today the cameras were vandalized and ruined there at the corner because I'm pretty sure that the folks moving in don't want to be on camera and it's a big fire hazard it's a big problem and there needs to be someone from the city that deals with the county on that particular piece of land that is already has many camps on it and there's many more springing up now because the the 30 people off of Dorsey Marketplace and that's the Board of Supervisors number 30 people. So it's

unacceptable the fires that are happening. Some people are living along the sound walls right between Dorsey and Brunswick Road. There's camp set up in there. There's lots of camps that you guys are definitely missing on and need to be dealt with, um, for fire hazard, for sure. It needs to be a homeless liaison from the city that works with this subject, particularly because it doesn't seem like it either comes up at any of the meetings, even at all. And so that's for my public comment for tonight. Thank you.

Message:

Dear Grass Valley City Council,

I'm writing to ask that our city follow the lead of Huntington Park Mayor Eduardo Martinez in supporting efforts to require ICE agents to clearly identify themselves when conducting enforcement actions. Transparency and accountability are vital to maintaining trust within our community, and this policy would help ensure that residents understand their rights and feel safe.

<https://ktla.com/news/local-news/huntington-park-mayor-directs-police-to-enforce-ice-agents-self-identification/>

What is your stance on ICE?

Thank you for your service and for considering this important step.

Sincerely,  
Gina Groom  
Grass Valley resident

**Transcript:**

Okay. I'm going to just go ahead and try this. My address is 634 Brighton. I am involved in ongoing litigation and I am getting really tired of it as it defines insanity, doing the same thing over and over and over again and expecting a different result. In the meantime, I was notified that you were going to have a public meeting held on this notification that you sent me, which is a finance thing. And I went and tried to do my research and I found the issue for the open meeting. And then I, it seemed vague to me, so on the agenda portion, so I went ahead and looked at the next date, and I was appalled. I mean, frankly, I'm appalled because there's an open session on 6.8 to discuss this issue presented to me in this notice. Then on 6.10, there's a closed meeting. The closed meeting, the agenda is a predetermined outcome, a predetermined meeting that legal counsel, that the discussion, determined that the

discussion in the open session will prejudice the position of the local agency in the litigation. I don't know who of you thinks you're suing who, but I mean, I'm objecting, so my opinion is not supposed to count because you could jeopardize, you could prejudice yourself in local agency litigation. The issue is this utility bill that I am not paying under protest because I have not received the services. I've got leaks in my street that I witnessed when they dug it up after they created a leak at my smart meter after they reset the meter. Then they reset it on a root that is growing along the leak that had existed in the street and told me that they would fix that, but they didn't. They filled it. Now I've got that tree growing right under my meter and nobody from the city willing to come out and actually take the root out like they said they would because I said leave it open so I could remove it. And they go, no, we're going to take it out and we'll fill it. but they didn't because now it's growing not only under my meter, but it is now determined that it's gonna come up between the sidewalk and the block wall, which is a disaster waiting to happen. I've tried to kill it several times, it's not working. It's too dead set on getting to the water leaks. We had, we on a shared sewer line, both of us paying the full cost of the sewer line, and we had, or he had, a backup, and he was blaming it on me. In the meantime, finally after three or four different people, the guy put a camera down and found a leak in the street of the sewer line, with roots and whatever is going on. I came in and I said to the city, look, it's on the city street. When you put in the smart meter, you came around and you told me that everything that you owned the shutoff valve at this point that you were going to charge to come on and off the property to turn off the water, that I had no choice in the matter. It was I could not use the valve. In the meantime, I had a leak at that point that was 13 years ago when they installed the smart meter. Every single one of all of you and every contractor and every homeowner seems to have some kind of mental block. I don't understand it. Impractical thinking. It's just impractical. You come and you say, well, if the water leak is on your side, it's your problem. If it's on our side of the meter, it's our problem. And then they come on and find a leak, and I said, don't be ridiculous. You installed the whole thing. If it leaks at all, then it's your installation, your problem. You can't foist that charge off on me. And then what? say, you must pay or we will turn off your water, and then notify me how illegal it is for me to live in a house that has no water, no hot and cold running water. You have breached every contract that there is, and when you have issues in the street concerning environmental waste leak in the city street, under the city street, and the city street is cracking and it's sinking in certain places around these cracks. And my house actually slipped and fell, slid, in keeping with the crack in the street. My insurance company tells me at that time that I have to pay to replace all the galvanized pipe. My house was supposed to be plumbed in copper. Meantime they dig up the city street, the city street is all galvanized. And then they send me a new

reinsurance bond. I pay \$5 a month and eventually they're going to replace my exterior lines for \$12,000. I am not giving you \$12,000 for you to determine that you're going to look into the fire risk. You shut off my water. I can't put out a fire, okay? You shut off my water, I lose my right to water, okay? And if you leave me on welfare, instead of actually forcing the insurance company to pay the claim that covered and breach every inch of the contract, it's the insurance manipulating your decisions. That's all it is. So I have plenty of comments on this, And I'm not allowing you to put this back to the treasurer, voice this charge for water usage that I don't owe you if you owe me repairs and an engineer's report to tell me why the city street is cracked in exactly the same places that my house cracked when I filed the homeowners insurance claim. and then you let the insurance company cancel my insurance policy as a known risk that I can't afford anyway if they go into court and get the judge to rule that they are entitled to discovery. They sanction me, sanction me, sanction me, sanction me for being unable to afford to provide discovery. Okay? When all they want to know is who I am, where I was born, when I was born, was I insured, was I injured, did I have a car accident, blah, blah, blah, blah, blah, blah, blah. It's pathetic. So I can't get an answer from you, and if you're going to be the one that is going to prejudiced in the open session, it's summary. If you're going to be prejudiced because I'm commenting and I've been telling you all, all this for 13 years and more, 26 years on the other hand, okay, then you need to stop and take notice. You can't put me with risk management and have them go into a closed session and say we're not going to deal with I guess they're going to sue somebody, maybe, or maybe it's just me that sued them. I can't pay the county treasurer the money they want for the taxes for services where you all go into secret litigation and when you win you put it in the public fund and you use it the way you want and you never take care of the issues that allow you to deliver utilities. you're supposed to provide clean fresh water and the public road and transportation whatever you've got to fix the pipes on Brighton you can't you can't abandon your oldest customers that were paying you for years and years and years and just abandon them and just pick and choose who you're gonna fix okay pick and choose who you're going to replace their sewer lines. And then watch my house deteriorate and then say, but we've determined risk management doesn't want to negotiate. Please stop. OK. There's my public comment that isn't going to matter because you can't answer because you will prejudice yourself and the public agency in the litigation. You're appalling. Thanks for watching!
