RE: Tablet Command Sole Source Status

February 20, 2024

To Whom It May Concern:

Tablet Command, Inc. is the sole source provider for all Tablet Command software and services.

We are the sole provider in the market space providing an iOS application used as a notification, incident command, resource management, and accountability solution that integrates through a direct interface with customer computer-aided dispatch (CAD) systems.

Our product is unique in the following additional ways:

- Simple, intuitive drag-and-drop user interface
- Supports iOS and Android
- Integrates with customized Esri ArcGIS Online Web Maps
- Integrates with multiple vehicle location (AVL) sources
- Integrates with multiple staffing solutions
- Able to view interagency shared AVL across jurisdictional boundaries
- Incident management functions in a disconnected state
- Viewing incident management changes in real-time with Real Time Sync (RTS)
- Ability to integrate with FireMapper
- Supports In-App Audio Streams

Tablet Command is sold only as a direct transaction between Tablet Command, Inc. and its customers.

Sincerely,

William Pigeon
CEO
