334 - ROAD DEVEL	PW	Grant / Fund Balance	Public Works submitted for a USDOT Federal Grant for \$250,000 under the Safe Streets and Roads for All (SS4A). This is a reimbursable grant for \$200,000 with \$50,000 City of Greeley match. The grant will pay for developing a Safety Action Plan for the City of Greeley. This will enable the City to submit for future SS4A grants for capital improvement projects. This scope of work lays out a comprehensive high-level approach for developing a plan of action to drive Greeley's Vision Zero (VZ) Safety Action Plan. It focuses on critical steps to develop a high-quality, action-oriented plan, including public participation, analysis of trends, development of goals and objectives, and implementation methods. A Vision Zero Plan includes a holistic well-defined process to eliminate severe crashes and reduce other types of traffic crashes. This Plan would include goal setting, planning structure, safety analysis, engagement and collaboration, equity considerations, policy and process changes, strategy and project solutions, and progress and transparency. The City has committed to building upon previous safety activities and addressing the top three priorities of the developed Vision Zero Plan by 2025. This plan will make identified projects eligible for future SS4A funding.	50,000	200,000	250,000	-

	Department	Funding Source	Description	Fund Balance	Revenue	Expenditures	Net Impact
421 - WATER OP	PERATIONS						
21	w&s	Fund Balance	The City has been in the process of updating water meters that now use a cellular connection. Not only can customers check their usage and conservation efforts, the connection allows for automated leak detection. The cellular connection requires a \$0.89 per meter charge (per month) to cover the cost of connecting to the cellular network.	290,000	-	290,000	-
22	W&S	Fund Balance	This request will provide sufficient funding for chemical costs for the treatment of water. Chemical costs have continued to escalate, while source water quality at the Bellvue Water Treatment Plant & Boyd Lake Water Treatment Plant has declined due to runoff from the Cameron Peak Fire.	490,000	-	490,000	-
23	W&S	Fund Balance / Expense Reimbursement	This request is to appropriate \$8,290,000 in funds for the mitigation efforts against the lasting impacts of the Cameron Peak Fire. \$7,085,000 will be reimbursed both by federal & state entities for various watershed mitigation efforts. These efforts include the installation of sediment basins, wattles & log jam debris prevention structures, and aerial mulching. \$4,073,000 will be reimbursed by the United States Natural Resources Conservation Service Emergency Watershed Protection Program (NCRS-EWP) and the United States Forest Service (USFS). \$3,012,000 will be reimbursed by the Colorado Water Conservation Board (CWCB). \$1,205,000 will be appropriated using fund balance to cover the cost share of the reimbursements, although every effort will be made to have neighboring municipalities share this portion.	1,205,000	7,085,000	8,290,000	-
421 - WATER OP	ERATIONS			1,985,000	7,085,000	9,070,000	-
422 - WATER CO	NSTRUCTION						
24	w&s	Fund Balance	This request is to appropriate \$3,782,256 to secure further easements in the path of the pipeline to the Terry Ranch aquifer. This project will secure the isolated aquifer on the Colorado-Wyoming border for use as water storage to protect the City from further drought. Negotiations with property owners are ongoing and real estate is making purchases of the necessary easements for the entire project. The City is reimbursed for 80% of the cost for the first \$78.125 million spent to develop the aquifer as a water storage resource. These dollars are worth more now than they will be in the future, and the project is a priority of the Water & Sewer Board.	3,782,256	-	3,782,256	-
25	W&S	Fund Balance	This request will appropriate an additional \$75,000 for the Bellvue 60" Pipeline – Gold Hill Segment project. This project is for the final segment of the Bellvue 60" transmission line that will be capable of carrying the full future plant production of the Bellvue Water Treatment Plant to all four pressure zones in the City. In normal operating conditions, the pipeline will reduce pumping costs for the Mosier & Gold Hill storage tanks and reduce the operating time for the Boyd Lake Water Treatment Plant. We are projecting operating savings of \$780,000 per year.	75,000	-	75,000	-
422 - WATER CO	NSTRUCTION			3,857,256	-	3,857,256	-
423 - WATER CA	PITAL REPLAC	CEMENT					
26	W&S	Fund Balance	This request is to reappropriate the Cityworks project as it has reached its 3-year appropriation limit. Cityworks is a software and database system that will significantly improve the tracking of infrastructure and assets in the City. The department has tens of thousands of fire hydrants, valves, pumps, and miles of pipe. Maintaining records on these assets, including details of diagnostic tests and inspections is an important part of the department's maintenance plans and capital improvement planning.	333,128	-	333,128	-

29	W&S	Fund Balance	continue to complete the remaining construction and installation of an overflow and drainage system for the pond. This request is to reappropriate \$3,100,000 for the Boyd Water Treatment Plant Process Improvements project as it has reached its 3-year limit. The project needs to continue to complete the installation of the new flocculators at the plant. This request is to reappropriate the Bellvue Needs Assessment project that will fund the engineering, consulting, and construction work that will address the repairs and litigation expenses for the construction defect claims at the Bellvue Water Treatment Plant. This request will appropriate additional funding for the Lead and Copper Service Line Inventory & Replacement project and will address an immediate public health concern. This project funds the identification and replacement of lead service line water pipes in the water distribution system, both on the City-owned and customer-owned portions of the system. The City has been replacing lead pipes when they are identified on the City portion of the system. Changing regulations are making the City responsible for the lead pipes in the customer-owned portion as well. The City has until October	2,330,000	-	3,100,000	-
