

7.5.2.3. Hurricane Protection Devices. The temporary installation or closure of storm shutters, panels, and other approved hurricane protection devices shall be permitted on emergency escape and rescue openings in residential occupancies during the threat of a storm. Such devices shall not be required to comply with the operational constraints of 7.2.1.5. While such protection is provided, at least one means of escape from each occupied unit shall be within the first floor of the unit and shall not be located within a garage.

1010.1.4.6 Protection Devices for emergency escape and rescue openings. The temporary installation or closure of storm shutters, panels, and other approved hurricane protection devices shall be permitted on emergency escape and rescue openings and egress doors in group R occupancies during the treat of a storm. Such devices shall not be required to comply with the operational constraints of section 1030.4 or 1010.1.9. While such protection is provided, at least one means of escape from dwelling or dwelling unit shall be provided. The means of escape shall be within the first floor of the dwelling or dwelling unit and shall not be located within a garage without a side-hinged.

NFPA-1 section 1.2\* Purpose. The purpose of this Code is to prescribe minimum requirements necessary to establish a reasonable level of fire and life safety and property protection from the hazards created by fire, explosion, and dangerous conditions NFPA-101 Section 1.1.2 Danger to Life from Fire. The Code addresses those construction,

hazards created by fire, explosion, and dangerous conditions NFPA-101 Section 1.1.2 Danger to Life from Fire. The Code addresses those construction, protection, and occupancy features necessary to minimize danger to life from the effects of fire, including smoke, heat, and toxic gases created during a fire.

NFPA-101 section 1.1.3 Egress Facilities. The Code establishes minimum criteria for the design of

including smoke, heat, and toxic gases created during a fire.

NFPA-101 section 1.1.3 Egress Facilities. The Code establishes minimum criteria for the design of egress facilities to allow prompt escape of occupants from buildings or, where desirable, into safe areas within buildings.

NFPA-101 Section 1.1.4 Other Fire-Related Considerations. The Code addresses other

thin

NFPA-101 Section 1.1.4 Other Fire-Related Considerations. The Code addresses other considerations that are essential to life safety in recognition of the fact that life safety is more than a matter of egress. The Code also addresses protective features and systems, building services, operating features, maintenance activities, and other provisions in recognition of the fact that achieving an acceptable degree of life safety depends on additional safeguards to provide adequate egress time or protection for people exposed to fire.

- Eliminates secondary means of egress for occupants.
- Increases potential for Flashover and Backdraft conditions.
- Limits visibility for Firefighters and building occupants.
- Increase in firefighter injuries during fire suppression.
- Difficult for firefighters to determine if the structure is occupied.
