

## Consistency with Comprehensive Plan Policies

The proposed text amendment is consistent with the following policy-

**Policy 1.3.2.** The City shall establish locational criteria in the LDC for future rezoning of sites to higher density and/or intensity districts. The following principles shall be considered:

- a. Compatibility means that different land uses can coexist in relative proximity to each other provided that a use is not impacted directly or indirectly by another use.
- b. Increases in density and intensity must generally occur in a gradual fashion, avoiding abrupt transitions.
- c. High density residential uses should generally be located in areas that have adequate vehicular access and proximity to service uses.
- d. Spot zoning should be avoided. Spot zoning refers to changing the zoning designation of a small parcel of land for a designation totally different from that of the surrounding area for the benefit of the owner of such property and to the detriment of other owners.
