

Monthly FMPA Report 2026

August 2026

Rate Call

The average price of natural gas for the month was \$3.64. Natural gas prices over the last 30 days have ranged between \$2.85 and \$3.35. Natural gas storage remains above average and the extra natural gas as a by-product of increased crude oil production in West Texas have prevented any major spikes in natural gas prices due to the Iran conflict.

The projected rate for August and September is approximately \$79MWh and \$80/MWh respectively.

Natural gas accounted for 83% of the generation mix. Coal was 7%; nuclear was 4%. Solar generation was 3%.

The peak for the month was on 23 June at 5 PM.
