Existing Zoning Intent

The residential high density, R-3 zoning category district is intended to provide for multiple-family housing areas with densities of eight to 12 dwelling units per acre. This district should be situated so that it is well served by public services and have direct access to collector street or major thoroughfares. Careful attention must be given to traffic generation from this district to minimize impact on single-family districts.

Proposed Zoning Intent

The industrial (IND) land use category district is intended for light manufacturing, processing, storage and warehousing, wholesaling and distribution. Service and commercial activities relating to the character of the district are permitted. Location of this district must consider the provision of adequate public services, such as water, sewer, fire protection and availability to major highways, waterways and railroads. There are two zoning categories: M-1 light industrial, and M-2 heavy industrial.

The site is located within the City's Water, Sewer Service, and Electric Boundaries. It will be served by the City's utilities and sanitation services.

Attachments Include
