Over the weekend, we had a 911 call about a fire alarm at the DRC. After looking around, I found a smoke alarm in one of the unlocked fenced-off spaces that still had the battery in it. This brought up an issue; I couldn't reach Ian, and Syd was on a boat, so if the alarm were inside, it would mean breaking in. To solve this, I would like to know if it is possible to get Knox boxes for city buildings. This would give the fire department access to all buildings with a single key, which would be stored in the emergency rigs.

The Knox boxes would go to City Hall, DRC, Library, and the Community Chest. The boxes would cost $384 per box, leaving a total of $1,536, without shipping.

I think this might be worth discussing.

Thank you,

Sol Martinez

Fire Chief
