

## **Marine Facilities Coordinator (MFC) Quarterly Staff Report**

**Ben Sadler, Marine Facilities Coordinator / Harbormaster**

**Monday, December 13<sup>th</sup>, 2021**

My last quarterly report was at the October 11th General Meeting, and my next report will be at the April 11th General Meeting.

### **General Day to Day**

In this report, I won't be separating the Harbormaster position from the MFC portion.

For the most part this quarter I have spent my time trying to find a solution to the Steel float problem. As of this writing we still have not secured a contract or a company to move the float to its winter location in Bullmoose Cove.

Fairweather Construction and I were able to get the wooden floats moved in two trips in October.

We (Joe Vanderzanden and myself) were able to secure the gangway leading to the float on December 1<sup>st</sup>.

And I have been able to maintain the restrooms and the trash at the beach, while monitoring activity at the Dock and the Boat Harbor.
