Project: Hamburg Kress Pump Station

Scope of Work

The existing wet well ductile iron pipe is rotted and in need of replacement. Scope includes removal and replacement with new stainless steel pipe.

Notes

1. Removal and disposal of two existing ductile iron pipe discharge lines.
2. Excavation between wet well and valve vault.
3. Provide and install new stainless steel 6" discharge pipe.
4. Connect new pipe between wet well and valve vault.
5. Backfill excavation.
6. Check existing pump bases anchors.
7. Vactor services.

Not included:

Pump Station Bypass

Summary

Subtotal	\$ 37,000.00
