Re: Rustic Pump Station Repair Work

The Rustic Pump Station is now nearly twenty years old and is in need of some maintenance. More specifically, the ductile iron pipe is in poor condition and needs to be replaced. We propose to replace the existing pipe with stainless steel for better longevity. We have obtained pricing from Midwest Power Systems to complete this project. We also reached out to another contractor to obtain a quote, but they said they weren't really interested in doing this job.

I request approval to hire Midwest Power Systems to perform the aforementioned repair work for a total of \$37,000. Midwest did this same type of work at two of our other pump stations in recent years with great results. This expenditure was planned for in the upcoming fiscal year budget, but we'd like approval now to schedule the work, so it occurs this summer or fall.
