Fenili Shop Building Project Narrative

The Fenili Shop Building Project is planned to be built on lot 9 of the Crossroads Business Park. The project is a new building to support a growing cabinet making facility. Improvements include the structure, parking lot, and dumpster enclosure.

The site will use the existing sanitary lateral and a new water lateral will be installed to allow for a fire suppression system in the new building. The stormwater from the proposed project is part of a Village owned regional pond so no on site stormwater management is provided.
