

The Life Cycle of PET WASTE

You can help prevent POO-LUTION by picking up after your dog.

Every day in the Tampa Bay area, about 125 tons of pet waste is deposited on the ground that can add up to a pile of problems. Unscooped pet waste not only increases health risks to humans and other pets, it greatly impacts local water bodies with excess nutrients, leading to potential algae blooms and fish kills.

**Pick up and dispose of your dog's waste.
EVERY DAY, EVERY TIME.**

Here's to a healthier St. Petersburg - PEOPLE, PETS, and TAMPA BAY!

Proper disposal is required by St. Petersburg, FL City Ordinance Section 4-56.

The City of St Petersburg (stpete.org/PAWS)

Funding provided by FY 21 Florida Department of Transportation (FDOT) Stormwater Outreach & Education Grant

Tampa Bay Regional Planning Council (tbrpc.org)

Tampa Bay Estuary Program (TBEP.com)
