Bonded Debt Summary

Bonded debt information must be submitted in the format shown below. The submission of bonded debt information in an alternative format will not be accepted, since it precludes easy reference to the actual debt structure of applicant agencies. Please attach additional pages in the same format if there are insufficient columns to list all bonded debt issues.

Hildale City Council Public Hearing September 1, 2021 Summarized draft minutes

Public Notice issued in compliance with Statute, Ordinance, and guidelines.

Page | 1

Virtual copies can be viewed at: https://www.facebook.com/hildalecity/videos/437347384251143

Public Hearing transmission begins at 1:42:45 until the Public Hearing ends at 2:30:44. City Council action item begins at 2:35:50 and ends with a vote of approval at 2:37:10.

Presenters:

Eric Duthie, Hildale City Manager Jerry Postema, contract consultant to Hildale City Christian Kesselring, Hildale City Attorney

City Council:

Mayor Donia Jessop Council member Lawrence Barlow Council member JVar Dutson Council member Jared Nicol Council member Stacy Seay

City Manager Eric Duthie introduced the purpose of the public hearing and identified the detailed nature of a presentation and encouragement of public participation. Additionally, he identified the application process, submission process, review process a, and estimated timeline for additional actions after submission of the application by September 30, 2021. He then introduced Consultant Jerry Postema who continued the presentation from a series of slides displayed in the screens in the Council Chamber (2), as well as on the Zoom and Facebook video transmission.

Jerry presented the proposed Community Impact Board (CIB) funding of work involving the project, including the scope, location of where the work will be done, and the potential impact it may have. There were five priority projects presented:

- 1. The Water Treatment Plant at a total cost of \$4.1 million (M) involving construction cost of \$3.7M and engineering cost of \$0.4M. Engineering includes design, inspections, permitting, etc.
- 2. Wells to be located at the Water Treatment Plant at a total cost of \$1.3M. Two additional wells will be constructed at a cost of \$1.1M and engineering cost of \$0.2M.
- 3. Maxwell Canyon culinary water line replacements at a total cost of \$1.7M, of which \$1.4 M will consist of construction and \$.03M for engineering.

Mayor: Donia Jessop

City Council: Maha Layton, Lawrence Barlow

Stacy Seay, JVar Dutson, Jared Nicol

© 435-874-2323

435-874-2603

⊗ www.hildalecity.com

- 4. Water System improvements from the Utility Board priority list and the Water Master Plan at a total cost of \$9 M of which \$8.1M is construction and \$0.9M is engineering.
- 5. Water Canyon Vertical Well (planned as a pilot well for quantity and quality analysis) at a total cost of \$2.6M with \$2.1M construction and \$0.5M engineering.

Page | 2

Jerry explained the program is a Grant, Loan, or Grant/Loan combination as identified by the Five County Association of Governments on behalf of the Utah Permanent Community Impact Fund Board (CIB). Ultimately, if accepted, the CIB will determine whether it will be 100% grant or a combination of grant/loan or 100% loan. Hildale City will not know what the options are until it is set by the CIB.

Jerry displayed a presentation to the Council, Public and on the virtual transmission of the current Water Treatment Plant (WTP), with the potential well site locations identified. The planned upgrades to the WTP include a new building or addition to the existing building and drilling two (2) wells, one shallow and one deep. Both wells will feed into the WTP which brings more water sources to the system. The WTP would be enhanced for treatment with the clear well which would give additional water, a buffer, and give more consistency to the water before it goes out into the system.

Jerry provided pictures of a well drilling and additional pictures of a well drilling operation. The current interior of the Water Treatment Plant has three (3) white cylinders behind blue pipe, which is called a treatment vessel, that holds the filtration of the media that the water goes through and takes out the constituents such as iron, manganese, and radium. It is proposed to add more vessels to the existing treatment facilities, which would then have four (4) vessels, and an additional four (4) vessels to gain more water production and redundancy to better filter out the constituents. The goal is to enhance water treatment, redundancy, and improve operations and maintenance throughout the year.

A picture of the Maxwell Canyon Pipe that was exposed and broken during a recent storm with flooding was shown. The plan is to replace all the current PVC pipe with a high-density polyethylene pipe, which is much more flexible, stronger, durable, and easy to install.

The Current Distribution System Map and the Recommended Improvements Map from the Water Master Plan was displayed and explained. Improvements would be to upsize existing lines for current and future needs, add a recommended tank site with a new 300,000-gallon storage tank to the South, and a new 1M gallon storage tank on the Western side. This will help feed the installation of 78 new fire hydrants for improved fire protection.

Explanations were given of what typical construction work can look like in the street with the new construction work for these projects. There could be some inconvenience to travel when the work is underway. Detours could happen during trenching that goes for 1,000ft, backfill, put in plates, compaction, and restoration of asphalt.

Q 435-874-2323

435-874-2603

@ www.hildalecity.com

New construction work involves noise, heavy equipment, short interruptions in water service, street and road repairs, and short-term inconvenience.

The long-term benefits that come with this new construction work are safe and reliable drinking water, adequate water system pressure, improved water quality, new water sources for the future, and increased public safety (fire hydrants).

Page | 3

Engineer opinion of cost from Sunrise Engineering was shown from the presentation on all 5 projects:

Maxwell Canyon, Water Treatment Plant, New Wells, Water System Improvements. Water Canyon Vertical Wells, and all engineering work such as design, geotechnical, surveys, inspections, etc. for a total projected estimated cost of \$18.7 M.

To emphasize all project work, Jerry defined the projects further:

The Water Treatment Plant Site project includes **two (2) new wells**, six (6) treatment vessels, two (2) generators, a new clear well (bigger than 50,000 gallons), five hundred (500) feet of 12" pipe, two hundred fifty (250) feet of 16" pipe, addition to existing building or a separate building, electrical upgrades, and controls which gives ability to access remotely.

The Maxwell Canyon project includes 15,840 feet of 6" High Density Polyethylene Pipe, One (1) air release valve, and restoration of the ground and pavement.

The Water System Improvements include a One million (1M) gallon storage tank, one (1) 300,000 gallon storage tank, 78 new fire hydrants, 107 new valves, 2,211 feet of 6" main, 2,930 feet of 8" main, 3,300 feet of 10" main, 2,500 feet if 12" main, two (2) blowoffs (blowoffs help with dead end spots or where air is trapped to relieve air off for better water quality), two (2) pressure reducing valves (PRV) (these help re-boost pressure to areas that are under pressure to increase pressure throughout the system).

The Water Canyon Vertical Well project includes one (1) 18" diameter deep well, 7,500 feet of 8" main to tie into the existing system, one (1) generator to run the pump and motor and gives emergency power backup, one (1) pump (goes into the well), site plumbing and electrical, paving (both at site and tying in at the main system from ripping up the road a little bit), one (1) air release valve (for high point in the main to release caught air), water quality sampling (required), test pumping (to see how many gallons per minute). The professional services and permitting include Engineer design, survey, geotechnical reports, sections, bonding/insurance, bill review, coordination with funding agency permitting and testing.

CIB funding options allow for a Grant, Loan, or Grant/Loan combination. Standard CIB loan terms (2.5% over 30 Years), median household income (\$53,472), population (2910), service connections (402), average monthly water bill per household (\$58.00), annual average water bill per households (\$696.06), and percent of annual income to annual water bill (1.54%) are all considerations in the decision for funding options. These numbers are based on information gathered for Hildale City residents reflecting water bills on what they were billed for water and base rate only.

Mayor: Donia Jessop

City Council: Maha Layton, Lawrence Barlow

Stacy Seay, JVar Dutson, Jared Nicol

Q 435-874-2323

435-874-2603

⊗ www.hildalecity.com

Eric Duthie explained that CIB has a calculation that determines grant funding and loan funding. As related by the Five County AOG staff, 1.75% of median household income going toward water bills is a determining point for a grant, and below that is more seriously looked at as a loan. U.S. Census numbers for the year 2020 have not been received, so the numbers being given here are based off 2019. The Utility Board has expressed a desire to complete a study on water rates, because the rate has not been an adjusted for some time. This may also impact what the percentage is, as time moves forward.

Page | 4

City Attorney Christian Kesselring presented a spreadsheet calculator of financing costs for CIB programs provided by Division of Housing and Community Development at the State level. CIB regulations identify the importance of disclosing all financial potential impacts of the projects that have been presented, including those the CIB may award funding that requires repayment of a loan even up to 100%. The city would not be required to undertake the obligation, but if they did, it is important to understand what the costs would entail. He projected a chart onto the screen for Council, public and virtual watchers to review. The chart detailed his explanation that the standard amortization on a CIB loan is 2.5% (can go as low as 0 and high as 5%), the benchmark rate 2.5%, standard term 30, repayment term 2.5%, total projected payment of 18.7M, and water connections spread across with monthly increase to water bills of about \$249 per month under loan terms.

City Manager Duthie asked for any closing staff comments then concluded the presentation summarizing the overall CIB projects identified would entail a cost of \$18.7M including engineer opinion of cost.

Public Comments received:

In-person attendees:

Terrill Musser begins at 2:29:15 and ends at 2:30:04.

Mr. Musser expresses support for the application submittal, stating it is "well laid out" cites the impact of "clean water" on the current residents, as well as for future growth. He also identifies the need to keep "utility rates down" as a main concern for residents.

Electronic comments received through the Facebook comment section of the transmission: Chuck Hammon at the 1:55:59 meeting time

"I would like to express my support for these infrastructure projects. Water quantity and quality is a critical issue in our area. It should be one of our highest priorities. Thank you."

Jessica Richards Martinez at the 3:10:05 meeting time

"Regarding water in Hildale: I would love to see us be proactive and encourage water conservation now. Being originally from Phoenix, this is something I was made aware of as a kid in school. Our costs can go down and we are saving water for our children and their children.

I am aware of grants available now to roll out in our community.

Great meeting and you all are greatly appreciated. If no one has told you today, each of you make a difference."
