MOUNTAIN VALLEY ESTATES LUWD FEASIBILITY REPORT Rev 11-3-23 (email).pdf;

Eric & Lawrence,

I am forwarding you an email document that I have received from Ask Creek Special Service District requesting the Mountain Valley Estates project to look at a lift station and connection to the Hildale Lagoons instead of the mechanical plant wastewater system. I have had several verbal discussion with Mike Chandler, the district superintendent, regarding the district preference for Mountain Valley Estates to connect sewer to the Hildale Lagoons.

thanks,

Brant

Brant,

Based on our conversation yesterday, Ash Creek would like you to provide additional information on the cost/feasibility of a lift station and use of the Hildale Lagoons. This may be a better alternative to a LUWD system and should be further explored. Please see attached for additional redline comments on the feasibility report.

Regarding your questions below, Richard Jex should be able to sign the construction permit application for this project. The construction drawings should be submitted to Ash Creek. We will review construction drawings and submit them to Robert after our review.

Please let us know if you have any questions.

Thanks,

[Amber Gillette, P.E.](#)
