How list was built - draft Hillsborough UDO Prohibited list

	Source	Current inclusion in HUDO draft	Website	Notes on source
1	Original UDO Hillsborough list	All non-natives, which happen to be included already on NC IPC	https://assets.hillsboroughnc.gov/media/documents/public/recommended-and-prohibited-plants-list.pdf	We have removed the native plants from this original list. Our criteria are more focused on invasive plants. We assume the expertise on which plants will do well is held by the professional landscpers employed by developpers.
2	NC IPC 2023 Invasives list	All plants Rank 1 - Severe threat All plants Rank 2 - Significant threat Rank 3 and watchlists? TL on the case to find out which plants on these lists are still available commercially	https://nc-ipc.weebly.com/uploads/6/8/4/6/6846349/invasive_plant_list_-_ranked_-_2023-11-16.pdf	This is our main source of inviasve plants. It has been contributed to and is used by the main actors in invasive plant information such as the Botanical Garden, Wildflower NC, and many knowledgeable contributors. NC Invasive Plants List ranks invasive plants by level of threat and also includes a "watch list". Invasive plants are ranked as: Rank 1: Severe Threat Rank 2: Significant Threat Rank 3: Lesser Threat Watchlist A and B
3	NC IPC 'shun list'	All plants on this list.		41-ish plants that IPC consider invasive and readily available to purchase
4	NC IPC Piedmont list	All except 7 plants on this list.	https://nc-ipc.weebly.com/piedmont-invasive-plants.html	Omitted 7 plants on this list, those being Ranks 3 and below, AND not available for purchase: Tribulus terrestris Cyperus entrerianus Heracleum mantegazzianum Lygodium microphyllum Oplismenus hirtellus Tamarix ramosissima Ludwigia hexapetala
5	Raleigh Invasive Species program	thinking about daylilies and crepe myrtles	https://cityofraleigh0drupal.blob.core.usgovcloudapi.net/drupal-prod/COR24/invasive-species-native-alternatives.pdf	Includes a couple problematic plants that aer not IPC invasives - Crepe myrtle and daylillies. Something to consider in our local environment.
6	NC Forest Service	All plants on this list	https://www.ncforestservice.gov/forest_health/invasives.htm	Very short list already covered by NC IPC list !
7	Tree board members			Please look around town and tell me about plants that are becoming bothersome

Other sources considered but not included in consideration spreadsheet

	Source	Why not included	Website
1	UNC Botanical garden	Uses NC Invasive Plant Council November 2023 list	https://townofcarrboro.org/2679/invasive-Plants
2	NC Wildflower	Uses NC Invasive Plant Council November 2023 list	
3	Carrboro website	Uses NC Forest service list	
4	Durham UDO	This list uses 1999 and 2005 sources, as well as sources that are not cited. Does not explain criteria for inclusion in list. May have included plants that are over-represented in urban landscapes but it doesn't say. I decided to cross refer but not consider too hard, as we have the Mother invasive list from NC IPC now.	https://www.durhamnc.gov/DocumentCenter/View/1034/Landscape-Manual-for-Durham-NC-PDF?bidId

Questions!

Are there any plants not listed that invade yards in Hillsborough?

How can we break this list up so our main worries are highlighted and so we don't lose our audience?

Just ban all types of ligustrum instead of naming them?

should we say all non-native lonicera? I guess we are not allowed to and need to list the banned ones out

Should we prohibit plants that are not doing well in this area, either due to pests of climate? Or just stick to those that are invasive?

If we are thinking longevity of plantings left by developers, this might be worth considering

(Sharon - ash, hawthorn, sweetgum)

Should we call them forbs or herbs?
