Native Plant Month
April 2026

WHEREAS, native plants are indigenous species that have evolved and occur naturally in a particular region, ecosystem, and habitat; and

WHEREAS, native plants are vital for maintaining and restoring the healthy ecosystem needed to sustain our environment, including seed dispersal; pollination of crops and natural vegetation; prevention of flooding, drought, and erosion; regulation of disease-carrying organisms; and moderation of weather extremes; and

WHEREAS, North Carolina is home to more than 3,900 native plant species, including trees, shrubs, vines, grasses, and wildflowers, making it one of the most diverse states for native plants in the Southeast; and

WHEREAS, native plants provide shelter as well as nectar, pollen, and seeds that serve as food for native butterflies, insects, birds, amphibians and other wildlife in ways that non-native plants cannot; and
