

April 1, 2022

Dear Customer:

City Ordinances require certain automatic annual adjustments to the water and wastewater rates based on inflationary indices. The one-year inflationary index for our area is 4.3%. The City of Houston population increased by 1.3%. The inflationary index of 4.3% when combined with the population increase of 1.3% results in an automatic annual water and wastewater rate increase of 5.6% on April 1, 2022.

This year, in addition to the 5.6% automatic annual rate adjustment, Ordinance No. 2021-515 adopted the 2021 Water & Wastewater Cost of Service Rate Study, which allows for new annual rates over a 5-year period. These rate adjustments are necessary to pay increases in the cost of operating, maintaining, and repairing the combined water and wastewater utility system, debt service on the utility system's bonds and other obligations of the utility system, protect the financial integrity of the utility system, and comply with certain bond covenants and all other applicable law. New Rates and Charges specific to GRP Area 1 & 2 and Contract Sewer accounts are as follows:
