INTRODUCTION

Hilshire Village Residents,

Fall is officially upon us. Hopefully, everyone is enjoying the cooler weather and gearing up for the holidays.

KEEP IN MIND:

- Be sure to lock all doors and windows in your home, when you are not on the premises.
- Lock your vehicle when it is unoccupied.
- If you see something, say something.

As always we are here if you need us.

Sincerely,
Chief M. Schulze

1025 CAMPBELL ROAD, HOUSTON, TX 77055

Suspicious Activity

- If you observe anything that you may feel is suspicious, you can call our non-emergency line 713-465-8323.

Example of Suspicious Activity:

- An individual peering into vehicle, to try and locate any valuables left unattended
- An individual trying door handles to vehicles, and/or residences to gain access to the vehicle and/or residence
- An individual checking front doors of residences to locate any unattended packages, or individuals following delivery trucks to see where the truck is dropping off packages.
- A vehicle is parked in an odd location or for a long period of time.
- Add our non-emergency number to your cell phone for quick access.
- Give as much detail as possible for the person or vehicle. (color of clothing, type of vehicle, etc.)
- Do not follow the vehicle or person for your own safety.

NOVEMBER AWARENESS:

COLON CANCER Awareness Month

CDC Vital signs™
November 2013

Colorectal Cancer Tests Save Lives

The best test is the test that gets done

Colorectal cancer (CRC) is the second leading cancer killer of men and women in the US, following lung cancer. The US Preventive Services Task Force (USPSTF) recommends three CRC screening tests that are effective at saving lives: colonoscopy, stool tests (guaiac fecal occult blood test-FOBT or fecal immunochemical test-FIT), and sigmoidoscopy (now seldom done).

Testing saves lives, but only if people get tested. Studies show that people who are able to pick the test they prefer are more likely to actually get the test done. Increasing the use of all recommended colorectal cancer tests can save more lives and is cost-effective.

To increase testing, doctors, nurses, and health systems can:

- ◊ Offer all recommended test options with advice about each.
- ◊ Match patients with the test they are most likely to complete.
- ◊ Work with public health professionals to:
 - Get more adults tested by hiring and training "patient navigators," who are staff that help people learn about, get scheduled for, and get procedures done like colonoscopy.
 - Create ways to make it easier for people to get FOBT/FIT kits in places other than a doctor's office, like giving them out at flu shot clinics or mailing them to people's homes.
