SERVICES PROVIDED

1/5/23

2 HOURS

Backups failing and unable to switch backup drive. Went to office and determined that the issue was related to disk errors on the backup USB disk that locked up USB Driver. System errors potentially indicating possible bad USB cable. Had to reboot server to get USB drives working again. Also did WIndows Updates. Was able to get backups working after reboot with 1 of the disk drives using existing cable but they need to replace the USB cable. WIll need to test and resolve issues with USB Disk to ensure drives are functioning properly.

1/11/23 2 HOURS

Worked remotely to resolve network issue with notebook not connecting to hotel wifi. Had to develop script commands to modify Forticlient web filter to issue a warning instead of denying access to the hotel wifi network. Then worked with Lisa Ray to get the commands ran on the notebook.

1/13/23 1 HOUR

Worked to resolve problems with USB Backup Drives. Red and green drive bad- failed to be recognized by system unable to mount disk or repair. Drives need to be replaced. Pink drive is good.
