**Agenda Item**

Bolton & Menk Aerator System Review Scope of Work Proposal

**Meeting Date**

July 8, 2025

**Prepared By**

Leaha

**Monthly Report**

As we have been working through replacing the aerators at the sewage treatment plant, the project is growing and becoming more complicated. We want to ensure, before we start, that all the different pieces have been identified and that, at the end, we will have a product that works as expected.

**Recommended Action**

Approve the contract with Bolton & Menk for Preliminary Engineering Review of the Wastewater System's Aeration Components for \$9,500.00.
