

Hinckley Fire Relief Invests in Public Safety Building Upgrades;

Hinckley Fire Relief is proud to announce its commitment to enhancing the public safety building—a vital hub for our community and Fire students across the county. Understanding the importance of a welcoming and durable environment, we have accepted a bid from Ausmus Flooring to upgrade the building's flooring.

The project entails the installation of new carpeting throughout the meeting room and hallway, ensuring a comfortable and professional space for community gatherings and public meetings. Additionally, we will be applying an epoxy finish to the kitchen floor, which will not only improve aesthetics but also provide a durable, easy-to-clean surface that can withstand high traffic and rigorous use.

This investment into the public safety building is a testament to our dedication to the well-being and development of the community. The upgraded floors will not only rejuvenate the space but also ensure that it can be enjoyed and utilized effectively by our residents and the many students who visit from throughout the county.

We are excited to see these enhancements come to fruition and to continue our support for projects that positively impact the community we serve like Hog and Hoses.

Please accept this donation on behalf of the fire relief to make these upgrades.

Thanks,

Bill Chose Hinckley Fire Relief president.
