

The Homewood Creative Alliance is a non profit organization that designs immersive art experiences that strengthen community and highlight local artists.

We collaborate closely with residents to ensure our projects reflect what the community wants and values.

By making art interactive, inclusive, and visible in public spaces, we foster connection and a sense of belonging.

While we are a new organization, we have already accomplished a few successful events including a community weaving project that is now on display in the Homewood Public Library, a small pop up market during Witches Night Out, a community art swap, pop up family portraits at Homewood Holiday Lights, and an art auction where we partnered with Spotlight Performance Academy's benefit concert.
