Beginning with the 2016-17 fiscal year the City began distinguishing within the funds some part of ending fund balance as contingency and some as reserved for future expenditure. The contingency is included in appropriations while the reserve for future expenditures is unappropriated.

The City uses multiple Special Revenue funds to account for revenues that are restricted to expenditure for particular purposes. They include funds for debt service, economic development, parks and recreation, capital projects, and grants. Since these funds are not operational in nature and used for specific purposes from year-to-year, their expenditures do not typically follow a predictable pattern so budget variances are not calculated for them.

Geer & Harper Re-alignment (\$1,600,000)

This intersection needs to be reconstructed to improve traffic/pedestrian access and ensure connectivity to property east of N. 1st Place. The current configuration makes access difficult for large trucks and traffic backs up on Harper Road during busy times during the day.

Current Update: Construction began in June, with full closures of the railroad crossing and the Geer/Harper intersection.

Gettman Road Extension ROA (\$650,000)

Gettman Road Extension right of way acquisition project.

Current Update: Acquisition has closed on approximately 76% of the proposed Right of Way. Negotiations continue on the remaining 24%.

NW 2nd Street Paving (\$580,000)

Northwest 2nd street paving of existing gravel street from West Elm street to West Cherry Avenue to include grading, storm drainage, asphalt, centerline stripes, and crosswalk.

Current Update: Preliminary construction activity began in June.

RWS Backup Generators (\$5,000,000)

To provide backup power supply to the regional water system.

Current Update: Site preparation and on-site electrical work took place in June, as well as an initial payment for acquisition of the generators themselves; however, delivery and installation of those long-lead-time items is not anticipated until Winter 26/27, with installation work anticipated to be coordinated around planned outages by the system users throughout 2027.

AWS System Expansion- RWS (\$29,449,400)

Amazon Web Services is paying to extend the City-owned 16" water main in Feedville Road approximately 7,000 feet to connect with the City's other existing water infrastructure in Kelli Blvd. This project will also upgrade various pumps and motors in the Regional Water System and chlorinate and perform the necessary functions to convert the line to carry potable water. AWS is also paying the City to design a second, permanent, 24" non-potable water main in Feedville Road. Additionally, this will construct an aquifer and associated storage system.

Current Update: ASR Testing Complete. The initial round of recharge has begun at a rate of 1,350 gallons per minute, putting the project on-track to recharge between 400 million and 500 million gallons by April. For reference, this is equal to about 1/3 of the entire city's water usage for an entire year.

Orchard Water Line Replacement (\$1,340,000)

Replaces 3,200 feet of water main line along W. Orchard Ave. between S.W. 7th St. and S.W. 11th St., and along SW. 9th St. between W. Orchard Ave. and W. Juniper Ave.

Current Update: Construction began in earnest in June, with the project wrapping up by late Fall.

Well # 6 Chlorination (\$1,000,000)

The chlorine room at Well No. 6 is 5 feet by 8 feet and too small for its current use and is constructed of fiberglass. It was originally constructed to occasionally store chlorination equipment. It is now in constant use and has been damaged during the exchange of chlorine cylinders. A larger building will allow more efficient operation of the well.

Current Update: Site-work began in earnest in June, with vertical construction imminent by the end of the month. Work will proceed through the construction season.

Well #4 Control System (\$410,000)

The 2,500-gallon per minute Well No. 4 pump was designed in the 1960s and is obsolete. The control system is unreliable and inefficient, and the piping system has been dismantled to use for parts in other systems. The station experiences large pressure fluctuations and configuring the pump control valve is challenging. The pump house also needs to be updated to ensure reliability during peak demands.

Current Updates

Contractor delays may require this project to wait an additional year. Liquidated damages may be considered.

Dogwood Street (\$275,000)

The existing gravel roadway will be replaced with a fully developed street, including curb/gutters/sidewalk.

Current Update: Preliminary construction activity began in June.

SE 10th Street Bridge Improvements (\$100,000)

Replaces and widens the bridge across the 'A' Line Canal.

Current Update: Design proceeding, with construction planned on a timeline inverse from normal, with SE 10th requiring closure and bridge replacement over the winter of '26-'27 to accommodate when water is not in the canal.

Lift Station #5 Wetwell Upgrades (\$150,000)

Lift Station No. 5 is one of the city's newer lift stations. There is paint flaking on the pumps and hydrogen sulfide corrosion on interior surfaces from the raw sewage. Without upgrades, the mechanical equipment will need premature replacement.

Current Update: Design will begin soon.

E. Evelyn Avenue Gravity Sewer Line Replacement (\$480,000)

Multiple deficiencies exist in the pipe segments, including structural failures, sagging, root intrusions, and separated joints that cause blockages hindering sewer flow and require the City to clean this line monthly. Newly installed pipe will save maintenance costs and drastically reduce the likelihood of blockages, mitigating the potential for sewage backing up into local residences.

Current Update: Preliminary on-site work began toward the end of June.

Lift Station #7 Rebuild (\$600,000)

Upgrade to electrical and control systems, replaces duplex pumps and mechanical pumps, rails, and valves and planned safety improvements to surrounding sidewalk.

Current Update: Bids were received end of June, with contract award and construction in Summer through Fall 2026.

AWS Cooling Discharge (\$2,805,000)

Amazon Web Services is paying the City to design a discharge solution for their non-contact cooling water which is used to cool their facilities. This solution will require installation of a lift station and approximately 10,600 feet of a new discharge water Main in Feedville and South 1st to discharge into the Hermiston Irrigation District's A-Line Canal. This work will also require the development of a separate NPDES Permit for the new discharge.

Current Update: Design has begun related to Feedville/OR207 Sewer Main. Bid opening anticipated in Fall.

Urban Tree Project Grant (1,000,000)

Federal grant for purpose of urban tree projects for tree planting throughout Hermiston

Current Update: We are pausing work on this project pending a better forecast of the federal budget. Preparing an estimate and bid package for a possible tree planting project on main street if federal budget moves forward.

Sherman Park Project (\$420,000)

Cimmaron Park is to be built on land purchased from and donated by the developer. The park will include a nature trail and a natural playground system. The City was recently awarded a state grant for a large portion of this project. This project will develop a 0.61-acre park featuring a playground, gazebo, pathways, and landscaping. The park will be adjacent to the existing 8.61-acre Cimmaron Recreation Area, which includes a trail encircling the wetlands.

Current Update: Bid documents to be circulated to contractors beginning next week (July 27-31).
