PUBLIC COMMENT

- Mike and Melissa Boyland joined our meeting to voice concerns regarding the 5G tower that was recently erected in Highland Park near the playground as well as additional 5G towers being installed around Hermiston. Primary concern is there has not been official health and safety studies as 5G is known to emit radiation and putting children and elderly in our community at risk of exposure and health risks.
- Director Artz will be gathering information, approvals and site plans about where 5G tower being installed and report back.
