Huerfano County Building Authority Board (HCBA) Staff Report

Complaint:

We had a Colorado Registered Engineer call our office to notify us his wet stamp had been used against his approval by someone who was not a Colorado Engineer. When reviewing building permits, we came across **four** builds that had the fraudulent company on them with the Colorado Registered Engineer stamp of a deceased person. When Colorado DPO was contacted, the deceased person's license number was registered under the company *Advanced Design Build LLC*, we were told by the staff member that they only assign license numbers to individuals not companies-- the stamp was reissued to Bradley Hudson Ermel. We were given a contact (June Nieto) in licensing, requested to file a complaint, and requested to send an email to the Colorado Engineers Board about our situation.

Currently:

We contacted June Nieto, who then forwarded us to someone else because she only did new licensing. The gentleman asked for us to submit the complaint form and David Weihrich and Advanced Design Build LLC will be going before the board in June. We have not filed a complaint because there is not a registered license to lodge a complaint against.

Staff Thoughts/Comments:

The Department is going to reach out to the Pueblo Regional Building Department to see what direction they will be taking with this situation.
