Starting next year Garden Jubilee will not allow the following plants to be sold at the festival. Most of these are common sense and well-known invasive species. We know responsible growers would not sell most of these varieties. We would prefer that you not sell them this year if possible. We understand that if you grew some of these specifically for Garden Jubilee and we will allow them this year. Please refrain from selling anything on this list next year or risk losing your booth space. This list was complied by the Asheville Botanical Society and agreed upon by the Hendersonville Tree Board.
