

Notice of Grant Implementation (NOGI)

The Hendersonville Police Department identified the need to have real-life training scenario platform for de-escalation and firearms training that officers could face.

The funds from this grant will help to off-set the cost of purchasing this equipment. The overage will be supplemented by city funds and no other federal funds will be utilized.

Request for Sole Source Provider of the Virtra platform is requested and the form has been uploaded.

A bid of the initial equipment from Virtra has been received and uploaded.

The City of Hendersonville Grant Coordinator, City Attorney, Finance Director and myself will ensure all Federal and State Regulations are reviewed and followed.

Once the NOGI is approved, the City of Hendersonville will enter into a contract to purchase the Virtra Platform. Once the equipment has arrived, an inventory to ensure that all components are present will take place. Photographs of the equipment will be taken to later be uploaded. The equipment will be assigned a Property Identification Tracking number and entered into the Quartermaster inventory system.

The project director and Grant Coordinator will ensure that all the proper financial reports are completed and submitted into GEMS.

The Project Director will submit a reimbursement request once the City of Hendersonville has paid in full the contracted amount with Virtra.
