

SECTION 4.06.00 ARCHITECTURAL REQUIREMENTS

4.06.00 ARCHITECTURAL PLAN REQUIREMENTS

4.06.01 Purpose and Intent

- A. Architectural requirements are an integral part of the LDC in order to ensure quality development, create a sense of place and community, and to enhance the physical environment. All architectural plans submitted under this Chapter must be signed and sealed by a licensed architect registered in the State of Florida.
- B. These standards are intended to:
 - 1. Encourage a diversity in housing styles, shapes, and materials in order to create variety in the streetscape,
 - 2. Encourage richness in design through materials and details,
 - 3. Maximize the positive impact of development,
 - 4. Ensure that non-residential building facades are designed to a human scale, for esthetic appeal, pedestrian comfort, and compatibility with adjacent development,
 - 5. Ensure that larger non-residential buildings are designed to reduce their apparent bulk and volume through design and landscaping,
 - 6. Encourage sustainable architecture.

4.06.02 Residential Developments

In order to promote architectural character, the Town shall require new housing developments to offer a variety of architectural styles and elevations. These regulations promote both diversity in the exterior elevations of neighboring homes, as well as individual character in the design of each residence.

- A. For new single-family residential developments or infill single family development with six (6) or more adjacent lots:
 - 1. The same house model may not be used more than three times within a single block face. For purposes of this requirement, a different house model is a different floor plan, not the same floor plan flipped in a different direction and not the same floor plan with a different exterior treatment. When less than ten (10%) percent of the lots in a subdivision remain to be developed, the Planning Board may approve a home design to be used more than three times within a single block face. This option is intended to provide some flexibility in finishing the subdivision development while maintaining diversity in building design.
 - 2. Front porches shall be a required component on at least one quarter of the house models offered in a development. These porches shall be at least 6 feet deep and 10 feet wide.
 - a. Front porches may encroach into the front setback up to five (5) feet in Single Family Residential and Medium Density Residential developments.
 - b. Front porches may be screened, provided that the screen is located behind the railings.

3. Recessed garages or side entry garages shall be a required component on at least one quarter of the house models offered in a development. To be considered recessed, the garage shall be set back a minimum of ten (10) feet from the main building face, or five (5) feet if the house has a front porch.
- B. For all new residential development
1. Residential building walls shall be wood clapboard, wood shingle, wood drop siding, Hardie board siding, brick, stone, stucco, approved vinyl siding, or similar material.
 2. Residential roofs shall be wood, synthetic, or fiberglass shingles, solar shingles, tile or metal. Eaves are an important component of the roof design; they not only provide architectural character, but they help to protect building walls and reduce cooling costs.
 3. Fencing or decorative walls in residential front yards shall be a maximum of three (3) feet tall. Fencing in side and rear yards shall be a maximum of six (6) feet tall. Fences shall be wood, vinyl, wrought iron, or aluminum that is designed to resemble wrought iron. The architectural style and color of walls shall match the primary dwelling unit. Fences shall be erected so that the finished side is towards adjacent lots or the public right-of-way. Chain link fencing is permitted along the sides and rear lot lines of residential lots that back up to either a lake or wetland. Residential development in Agricultural and Rural Estates zoning districts may also propose special purpose fencing in conjunction with farm animals and horses.
 4. Perimeter fences or walls are permitted around a residential development up to a maximum of six (6) feet, provided that the fence and/or wall has architectural features compatible with the neighborhood. Fences and walls shall also include details such as banding, capping, columns (which may be up to 8 feet tall), and other elements to add interest. To enhance design, perimeter fences and walls are required to incorporate landscaping with breaks in the fence or wall (or change in direction). Perimeter fences shall be wrought iron, or aluminum that is designed to resemble wrought iron. Perimeter walls shall be faced with stucco, brick, or stone or a combination of those materials.

4.06.03 Single Family Residential Development Architectural Plans

At the time of Final Plan submittal (or at building permit for infill development), the applicant shall submit a complete set of the residential design plans. This shall include the front, side, and rear elevations for each model that will be constructed within the development. The building elevations shall include the following:

- A. Roof plan: Residential homes shall have variations in roof lines and use dormers, wide eaves, and other architectural elements to add interest and sustainability.
- B. Wall materials and color options: See Section 4.06.02(B)(1) above for material options. Walls cannot be all one material and/or all one color. Primary facades shall have one base color and a minimum of one complementary accent color. A complementary wall material may be used to meet the second color requirement.

- C. Exterior architectural details: Each home shall incorporate architectural details to add interest to all sides of the building. Primary facades shall incorporate a minimum of four (4) architectural details and secondary facades shall incorporate a minimum of two (2) architectural details. These include, but are not limited to:
1. Windows
 2. Shutters
 3. Porches
 4. Decorative elements
 5. Doors
 6. Columns
 7. Window boxes
 8. Porticos
 9. Cupolas
 10. Chimneys
 11. Enhanced landscape treatment which provides for one additional planting area with a minimum size of 400 square feet
 12. Other elements approved by the Town

4.06.04 Other Residential Development

Townhome development shall follow the same architectural standards as single-family development, except for Section 4.06.02 above.

4.06.05 Non-Residential Development

- A. For non-residential buildings, the scale and design should be compatible with surrounding development and the Town's overall character. Non-residential building walls shall be finished with wood clapboard, wood shingle, wood drop siding, Hardie board siding, brick, stone, stucco, approved vinyl siding, or similar material. Exposed concrete block or metal finishes shall not be permitted except when determined to be an integral feature of a recognized architectural style.
- B. Non-residential roofs shall be wood, synthetic, or fiberglass shingles or tile. Metal roofs may be permitted if determined to be an integral feature of a recognized architectural style. Flat roofing is permitted, as long as the rooftop is not visible from the right of way. False facades may be used as long as the treatment is used for all sides of the building.

4.06.06 Non-Residential Development Architectural Plans

- A. At the time of Final Plan submittal, the applicant shall submit a complete set of the building design plans. This shall include the front, side, and rear elevations. The plans shall include the roof design and show all pertinent details (windows, shutters, porches, decorative finishes, doors, colors, materials). The plans shall be drawn to scale, and dimensions shall be clearly delineated. All elevations must be signed and sealed by a licensed architect registered in the State of Florida.
- B. Architectural plans shall also include screening details for service areas and mechanical equipment as well as site furnishings, lighting fixtures, and any

other information necessary to ensure consistency with the intent of this section.

- C. Architectural plans are required for any new non-residential developments, and additions or alterations to previously approved non-residential developments. Alterations may include, but are not limited to, changes in color, material, roof finishes, awnings, and other exterior features.
- D. Non-Residential Architectural Plans should also ensure the following:
 - 1. Facades should be designed to reduce the scale and uniform appearance of the building and provide visual interest. Each façade shall incorporate one massing technique and one articulation technique from the following list or other technique proposed by the project architect and approved by the Town Council. For every fifty (50) feet of wall that exceeds fifty (50) feet in length one additional massing technique and one additional articulation technique shall be applied to the entire wall length.

Massing Techniques	Articulation Techniques
Building wall offsets	Base course or plinth course
Colonnades	Windows
Cupolas	Facia
Towers	Cornice
Pavilions	Piers
Arcades	Arches
Building recesses and projections	Bays
Clock or bell towers	Brackets
Variations in roof lines	Balconies
Verandas	Portals
Overhangs	Wings
	Porches
	Stoops
	String courses
	Lintels
	Bay windows and oriels
	Show cases
	Transoms

- 2. Fences that are visible from the public right-of-way shall not be chain link unless the land use requires security fencing.
- 3. Variations in roof lines should be used to add building interest consistent with the designated building style. Roof mounted equipment is also required to be shielded from view. Flat roofing is encouraged if the roof can

be utilized (i.e., rooftop terrace), especially where such use can take advantage of views (i.e., for residential units above non-residential uses).

4. Large storefront windows are encouraged in retail areas as pedestrian-friendly components. At least 50 percent of the first floor of all buildings with a retail component shall be comprised of storefront windows, unless a waiver is specifically granted by the Town Council.
5. Non-residential buildings shall be painted with earth tone or pastel colors consistent with the designated building styles. Fluorescent and visually overwhelming colors which call undue attention to the property shall not be permitted. The fact that certain colors are “corporate” shall not be grounds for waiver from this provision. Where color schemes are used on non-residential buildings that commonly identify the business on site, those areas shall be considered signage and shall be included in the calculation of sign area.
6. Awnings, arcades, colonnades, arbors, trellises, and other similar architectural components should be a component of non-residential building design to add interest to the physical character of the area as well as afford a way for pedestrians to get out of the weather.
7. The main building entrance shall face the public right-of-way unless it is determined during the site plan approval process that such configuration is not practical. When parking is located on the side or rear of the building, the placement of a suitably large building entrance facing the parking area is permitted, but it shall not displace the main building entrance. Main building entrances shall be articulated in a manner consistent with the architectural style of the building.
