

**Parks and Recreation Board Monthly Report  
October 2025**

At the October 9, 2025, Parks and Recreation Advisory Board meeting for the Town of Howey-in-the-Hills, members reviewed and approved the minutes from the September meeting. During the old business discussion, board members provided updates on the condition of the Town's parks, reporting that Central Park, Griffin Park, Blevins Park, and the Cemetery were all in good condition, while Sara Maude Mason Park had minor issues with a loose board and staining on the boardwalk. Public Services Director Morgan Cates informed the board that the Stormwater Project on N. Lakeshore and Pine Street had begun, with new structures and piping being installed and sidewalk repairs planned upon completion. He also noted that he was working on the Request for Proposals (RFP) for the boat ramp project.

In new business, the board reviewed and discussed grant applications that had been submitted by the Town and considered potential funding opportunities for future park improvements. No public or board comments were made, and the meeting was adjourned at 6:20 p.m.
