<p>Description of Project (200 words or less):</p> <p>Create a concept design of a temporary police station. The building must meet all safety, hardening concepts, and all current security requirements. The area needs to provide adequate parking for visitors & staff. There is potential to acquire/lease a secondary site, rather than modifying the existing station.</p> <p>Costs were determined by consultant.</p>										
<p>Justification and Urgency for the Project (When is it required to be complete and why?):</p> <p>We are currently operating out of approximately 1500 square feet now. The architect said we should be at a minimum of 15,000 square feet to meet the current demand of todays world. As we grow, we are quickly running out of room and parking. The facility should be evaluated for a growth period of 20 years. The building is long over due for todays standards. When funding is available, the design will take around 1 year to design and agree on a design. the second year will be bidding the project and selecting a contractor that specializes in law enforcement facility construction, like Ajax Construction. The 2 to 3 remaining years will be site preparation and building and inspecting the facility as its built. I would suggest a construction manager be hired to over see this function. Specialty sub contractors should be used to coordinate IT, building security and controlled access entry/exit points. It's my belief this project will take up to 5 years from design to finish.</p>
