PETITION OVERVIEW

SITE PLAN AND DESIGN

This plat is part of a larger development of 65.6 acres. The overall site is comprised of three different zoning classifications, with variable housing types and densities for a total of 347 dwelling units and an overall density of 5.3 units per acre. There would be two access drives along New Augusta Road. The northern access drive would align with San Gabriel to the west, with a second access drive to the south.

This request would provide for the development of Section 1A. Section 1A would provide for 78 single-family detached lots along the southern portion of the overall site. A variance was granted in 2021 (2021-HOV-003) to allow reduced front yard setback for the western half of proposed Section 1A. Therefore, the western 47 lots would have a 20-foot required front yard setback. The eastern 31 lots would be required to meet the Ordinance standard of 25 feet for the front yard setback.

The plat meets the standards of the applicable zoning classifications, the variance grant, the zoning commitments and the standards of the subdivision regulations.

STREETS

The plat would provide for six new local streets, with four of the streets terminating in stubs to provide access to future development. All streets meet the standards for new local streets. Two of the streets and the roundabout would be stubbed to provide for connections to future sections.

SIDEWALKS

Sidewalks are required along all proposed interior streets and New Augusta Road.
