Performance quoted represents past performance which is no guarantee of future results. Investment return will vary. The value of an investment, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than what is stated.

Both TexPool and TexPool Prime are managed conservatively and seek to provide a safe, efficient and liquid investment, but unlike TexPool which invests only in U.S. Government securities, TexPool Prime may invest in commercial paper which has historically offered higher yields than government securities in exchange for greater credit risk.

An investment in the Pool is not insured or guaranteed by any government or government agency. Although the manager of the Pool seeks to preserve principal, it is possible to lose money by depositing money in the Pool.
